To:	All Limited Partners and Investors of the Pabrai Investment Funds
From:	Mohnish Pabrai, Managing Partner
Date:	January 18, 2022
Re:	**Q4 2021 Letter to Partners**

Dear Partners:

For the quarter ended December 31, 2021, a total of $4.4 million was added to the various funds by new and existing partners. December 31 was also our annual redemption date. A total of $35 million was redeemed from the various funds in 2021. In the last year, subscriptions were about $38 million – pretty much matching the $35 million in redemptions. Pabrai Funds is primarily open to offset redemptions. We aren't seeking more assets. I'm just trying to minimize the possibilities of us having to sell stuff we don't want to satisfy redemptions.

PIF2 is the oldest fund and has been closed to new investors for many years. SEC rules limit PIF2 to a total of 100 partners and the fund currently has one open slot. PIF2 is open to US-based investors who are Qualified Clients. The minimum investment to join PIF2 as a new partner is $4 million.

PIF3 is our offshore fund for non-US accredited offshore investors, and U.S. IRAs, foundations, and endowments. The minimum investment to join PIF3 as a new partner is $3.5 million. PIF4 is for US-based investors who are Qualified Purchasers. The minimum investment to join PIF4 as a new partner is $5 million.

For current investors in any of the funds, the minimum addition to their current investment is $25,000. For IRA investors the minimum is $5,000. Here are the deposit slips for PIF2, PIF3 and PIF4. If you are interested in or would like more information about the April 1, 2022 opening, please contact me at mp@pabraifunds.com or Kimberly Engleman at ke@pabraifunds.com.

The updated performance numbers on all the funds are:

THE PABRAI INVESTMENT FUND II, LP (US Qualified Investors) Performance Summary:

	S&P 500	PIF2 (net to investors)
10/1/00-6/30/01	-14.0%	17.4%
7/1/01-6/30/02	-18.0%	35.3%
7/1/02-6/30/03	0.3%	34.2%

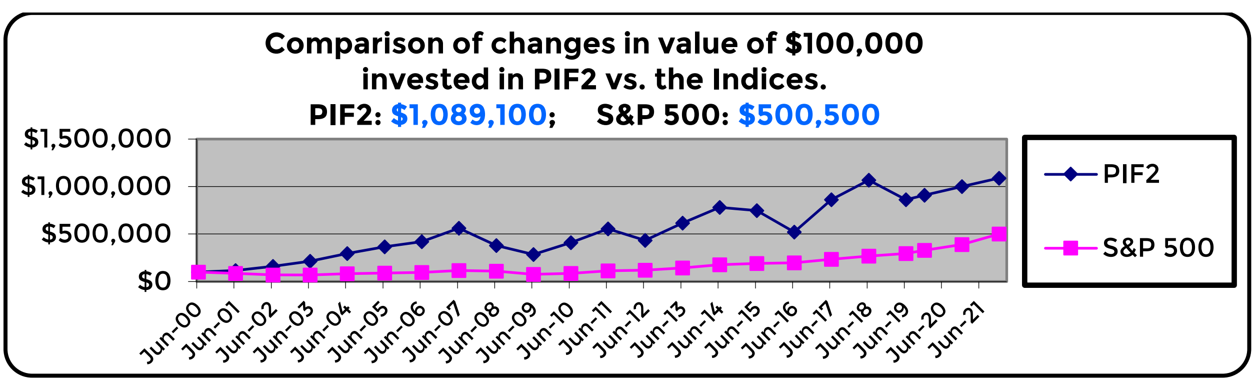
Cumulative	**400.5%**	**989.1%**



PIF2 Investors:

A $100,000 investment in PIFI at inception on July 1, 1999 and rolled over into PIF2 on 12/31/02 ($197,900) was worth $1,525,800 as of December 31, 2021 (net to investors). This equates to an annualized return of 12.9% since inception – after all fees and expenses. An investment of $100,000 in the S&P 500 on July 1, 1999 was worth $531,600 on December 31, 2021 – an annualized gain of 7.7%. The S&P 500 gains include reinvested dividends. In the graph above, the start date for PIF2 is shown as June 2000 for readability. The correct start date is October 2000.

PABRAI INVESTMENT FUND 3, LTD (Offshore/IRA Investors) Performance Summary:

	S&P 500	PIF3 (net to investors)
2/1/02-12/31/02	-20.4%	-5.2%

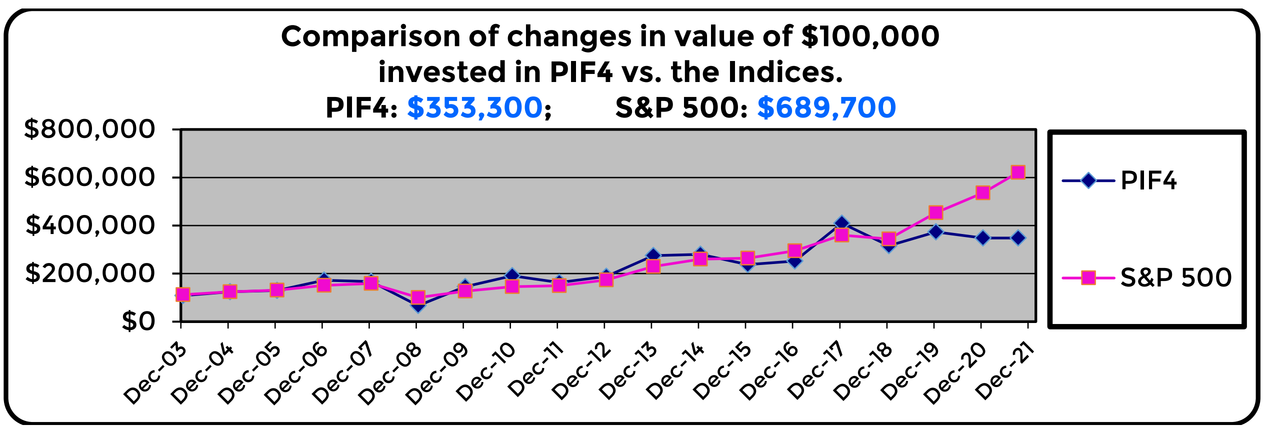
Annualized	**11.2%**	**7.2%**
Cumulative	**589.7%**	**253.3%**



PIF4 Investors:
A $100,000 investment in PIF4 at inception on October 1, 2003 was worth $353,300 as of December 31, 2021 (net to investors). This equates to an annualized gain of 7.2% since inception. An investment of $100,000 in the S&P 500 on October 1, 2003 was worth $689,700 on December 31, 2021 – an annualized gain of 11.2%. The S&P 500 gains include reinvested dividends. In the graph above, the start date for PIF4 is shown as Dec 31, 2003 for readability. The correct start date is Oct. 1, 2003.

General Comments

All three funds posted lackluster results for 2021. The funds delivered meaningfully better performance than the S&P 500 from their various inception dates through 2017. They have all underperformed for the last four years partly because our two largest positions, Fiat and Rain, peaked in early 2018 and then proceeded to drop precipitously. The Covid lockdowns led to Fiat being sold at more than a 60% discount to its Q1 2018 price (more on this below). Rain has made a comeback but ended the year about 50% down from its 2018 peak. I am very bullish on the prospects of all three funds. Baring extreme market dislocations, it is likely that our NAV will grow meaningfully in 2022 and beyond.

PIF3's -15.4% 2021 return was meaningfully worse than the other funds, which were at least positive. Much of PIF3's underperformance relates to the extreme devaluation of the Turkish Lira in December and the forced selling it had to do of all its India positions in Q2 2021 that I discussed in the Q2 2021 letter to partners.

The bad news is that PIF3 is heavily overdosed on some amazing Turkish compounders. The good news is that PIF3 is heavily overdosed on some amazing Turkish and other compounders. If I could, I'd happily put 90+% of my net worth into PIF3. Because PIF3 is an offshore fund, my investment in PIF3 is limited to my IRA. The Dakshana Foundation also has meaningful assets in PIF3. While all the funds are likely to have a great run through 2030 and beyond, PIF3 will probably deliver the best results of the three funds over the rest of the decade.

My optimism on PIF3 stems from what it owns. For example, PIF3 effectively owns more than 15% of the largest warehouse owner in Turkey. They have over 12 million square feet of prime warehouses that are 99% leased to blue chip tenants like Ikea, Carrefour, and Amazon. These are typically ten-year inflation indexed leases. The properties have an aggregate of $160 million of debt on them.

The replacement value of these warehouses used to be $60-80/sq. ft. But all the input prices like land, cement and concrete have skyrocketed globally. Replacement cost now may be $80-100 or more per sq. ft. That is a minimum liquidation value of $800 million, net of debt. They also have a rooftop solar business worth another $50-100 million. In a few years that solar business will have 50 MW of generating capacity and be worth $100-200 million.

PIF3's look through stake is worth well over $125 million. It is carried on our books at under $22 million. We bought our stake for less than $5 million! And I am ascribing zero value to a plethora of other businesses within that $22 million including the largest truck and freight railcar fleet in Turkey. The entire NAV of PIF3 is less than $145 million, so the Reysas stake is meaningful. PIF3 also has $120 million invested in an array of other remarkable assets that are also deeply undervalued with strong tail winds. This dog will hunt!

While the other two funds do not have the same degree of Turkish exposure, they are also poised to do very well in 2022 and beyond. A large portion of my net worth is in PIF2 and PIF4. I love my exposure to Pabrai Funds.

Premature Disposition

One of the biggest sins I have been repeatedly guilty of is selling too soon. To try to do better in the future, I'd like to drill down on three bets we made in the last decade:

1. **Fiat Chrysler**

Fiat	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021
Value (in millions)	$60	$112	$159	$193	$207	$395	$342	$470	$629	$745

Fiat	PIF Sell Date	PIF Invested Amount	PIF Realized Proceeds
Value (in millions)	4/6/2020	$70	$259

We invested $60 million in Fiat Chrysler in 2012 and another $10 million in 2013 for a total of $70 million invested. If we had simply held it all till today (including the Ferrari spinoff), we'd have made more than 10x on our investment in less than ten years. Our Fiat/Ferrari position would be worth $745 million – higher than the total AUM at Pabrai Funds! Instead, we had sub-optimal selling and collected proceeds of $259 million. Not a bad outcome, but around a third of what was possible.

Three realities in the last few years would have made inaction very hard:

1. Sergio Marchionne (CEO) passed away in June 2018. I would have passed on investing in Fiat in 2012 if Sergio wasn't at the helm. Our results are similar to the results if we had sold it all when Sergio died.

2. When Covid led to auto plants being indefinitely shut down in March 2020, Fiat started losing millions of dollars daily. It was very hard to predict what the world and Fiat Chrysler would look like three months or three years from then. The car business is very tough. Operating leverage works both ways and these businesses can get to liquidations very quickly if their production stays at zero for just a handful of quarters. We fully exited our Fiat position in April 2020 – and the stock is more than 150% higher now.

3. I had a very juvenile understanding of Ferrari's moat when it was spun out in 2015. It looked fully priced at a trailing P/E of over 40. It is up 6x since then.

I began to finally understand the moat of Ferrari when I became the proud owner of a Ferrari 488 Spider in 2018. Sadly, by then we had sold all our Ferrari shares. Like Google, Ferrari can make its earnings whatever it wants them to be. They can create a car like the Monza and offer 500 of them for sale at $2 million each and these get sold out in ten minutes. The cost of each Monza might be less than $400,000. Just on the Monzas alone they'd make $800 million. Ferrari can easily churn out a few billion a year in profit without breaking a sweat. The Ferrari market cap even today is just $62 billion. In 2012, Ferrari (inside Fiat Chrysler) was effectively valued at a paltry $1.7 billion.

I did keep much of our Fiat Chrysler stake even after Sergio passed away, but when Covid hit, all bets were off and we fully exited. I believe our decision to exit was correct based on all the available facts. My big regret is not the Fiat sale. It is the Ferrari sale.

2. **Moutai**

Moutai	**2015**	**2016**	**2017**	**2018**	**2019**	**2020**	**2021**
Value (in millions)	$28	$40	$90	$74	$147	$268	$285

Moutai	**PIF Sell Date**	**PIF Invested Amount**	**PIF Realized Proceeds**
Value (in millions)	7/17/2019	$23	$101

Based in China, Moutai is now the most valuable liquor company in the world. One of my good friends, who is among the world's best investors in Chinese listed businesses, suggested I take a stake. Moutai is probably close to the edge of my circle of competence when I made the investment, but there was a lot to like, and I plunged in. In 2017, I visited the Moutai factory and HQ deep in the hinterlands of China with my good friend Guy Spier and my daughter Monsoon.

I am a teetotaler but have recognized the pricing power of dominant liquor brands globally for a long time. In the case of Moutai, their fiery baiju has a production cost of less than $5/bottle and sells for well over $1200. Occasionally the company puts out a very limited run of aged Moutai at $40,000 (or more) a bottle and that is promptly sold out in ten minutes. It is estimated that well over 80% of the Moutai sold in China is fake. The demand widely outstrips supply even at $1200 for a small bottle.

In 2019, my friend who recommended Moutai told me it was time to sell. Who was I to question his judgment – so, sell we did. Moutai was a rare, borrowed conviction for Pabrai Funds. The $78 million we made was a gift. I tried hard to get Guy Spier to buy Moutai in 2015, but he wasn't interested. He regrets his decision to pass on Moutai deeply. Monsoon, on the other hand, bought a small personal stake after our visit and still owns it – with no plans to ever sell it. Smart girl!

Both Ferrari and Moutai share an attribute that is of some concern. Neither has an easy path to long-term double digit volume growth. Both have tremendous pricing power and can keep raising their top and bottom line by increasing unit prices. In the case of Moutai they have very finite limits on the amount of the special sorghum they can grow. The stories around the special Chishui river water, special sorghum, blending in with older vintages etc. is what gives Moutai its brand mystique and pricing power. They need to protect it.

In the case of Ferrari, they have produced 7000-10,000 cars a year for decades. Demand widely outstrips supply, but that is part of the brand power of Ferrari. They could take production to 20,000 and still not satisfy demand, but it may hurt the brand long-term. If we contrast this with brands like Starbucks or Coca-Cola that have no volume constraints; we can see why Starbucks has done so well – even with minimal price increases.

A few of our current portfolio bets will likely do better than Ferrari or Moutai in the years ahead. They have inferior brands, but exceptional growth prospects. We don't need all of them to do well for us to get to the promised land. Just 1 or 2 of them could make a meaningful dent.

3. **Rain Industries**

Rain	2015	2016	2017	2018	2019	2020	2021
Value (in millions)	$19	$27	$193	$65	$47	$60	$111

Unlike Fiat Chrysler and Moutai, we still own Rain Industries. This is not a post-mortem. In 2015, we acquired a nearly 10% stake in Rain Industries for $19 million. Rain is based in Hyderabad in India and was a classic future P/E of 1 investment. By 2018, the position was worth over $200 million, and, in my infinite wisdom, I did not sell. Did I mention that I am useless at selling? Even though we blew selling Rain at a 10x gain in less than three years, all is not lost. The stock is up more than 5x since 2015 and still has plenty of room to run. I discussed Rain at some length in the January 2021 Letter to Partners the '19 AR, the '18 AR, Jan '19 Letter, Oct '18 Letter, July '18 Letter and Jan '18 Letter.

What we paid for the stock in 2015 is what it is likely to earn in 2022 and beyond. Rain is a decent to good business. It is not a great business. It does have great leadership and a gifted capital allocator at its helm. At some point we will exit. I hope it is at a meaningfully higher valuation.

Concentration: A double-edged sword

Inaction would have served us well with Fiat Chrysler and Moutai. However, it is important to also note that such inaction would have made the various portfolios extremely concentrated. For example, in Q1 2018, Fiat Chrysler and Rain made up over 70% of the pie. As I write this missive, the top three positions of the three funds make up more than 50-65% of their total value.

Our largest position in all three funds is Micron Technology, which has a cost basis of $60 million and a market value of $143 million. It makes up about 1/4th of the pie and I think it is still deeply undervalued. Reysas, our Turkish warehouse owner, makes up 15% of PIF3 assets and we know how mispriced that is. It is likely the portfolio will get more concentrated as these assets approach their underlying intrinsic value. I am not planning to trim any of our high conviction bets unless they are fully priced or overpriced.

What is Mohnish useless at?

Minimizing mistakes is nearly as important as holding on to the great compounders. Practicing the art of value investing for the last 27+ years has made it clear that I am really bad at investing in certain industries. We have had many losers in our leveraged financial institution bets. We've had several winners as well. Silicon Valley Bank, American Express, Fairfax Financial, Wells Fargo, Goldman Sachs and Bank of America, etc. all worked well for us. But we've also had large, painful losses in Delta Financial, Compucredit, J&K Bank, South Indian Bank, Repco Home Finance, etc.

If I contrast this with Warren Buffett, he is off the charts at investing in leveraged financial institutions. I am not aware of any loss Warren has ever taken in this area in 50+ years! Salomon Brothers required very heavy lifting to not be a loser, but he got it done. On the other hand, Warren has had lots of difficulties with retailers and airlines. Most of his forays into jewelry and furniture retailing have not worked. They have not hurt Berkshire much as they were small bets – and I think he has mostly stopped making them.

> *"All I want to know is where I am going to die - so I never go there!"*
>
> \- Charlie Munger (who just turned 98!)

With all the arrows in the back, the lesson has been seared in. I've been taking an immediate pass on all leveraged financial institutions for some time now. Channeling Charlie, I don't ever need to go there. We have just one business in our portfolio (Edelweiss Financial) that has had some indigestion with its balance sheet lending and has put that business into runoff. Smart move. Edelweiss' other businesses like Wealth Management, Asset Management, Asset Recovery, Insurance, and Investment Banking are exceptional and growing rapidly. I discussed Edelweiss in the Q3 2021 Letter to partners. We expect to do very well with Edelweiss.

We Have Moved to Texas!

Pabrai Funds, Dhandho Holdings, Dhandho Funds and Dakshana have all closed their Irvine, California office and operations, and the office and team have permanently relocated to Austin, Texas. We are excited for our next chapter in the Lone Star State!

Please note our new address and telephone number:

1250 S. Capital of Texas Highway
Suite 1-520
Austin, Texas 78746-6414
USA

Tel: +1.512.999.7110

The entire team is happy with the move and loves our Austin office with its great views of downtown.

Alignment of Interests

My immediate family has a stake of 175,859 units of PIF2 and 433,197 units of PIF4. The administrative team at Pabrai Funds and I own 54,157 units of PIF4 and 17,841 units of PIF3 in various retirement accounts. In addition, The Dakshana Foundation owns 92,070 units of PIF3. The aggregate stake of the Pabrai family, the Pabrai Funds team and The Dakshana Foundation in Pabrai Funds is worth approximately $43 million.

Pabrai Funds charges no management fee, just performance fees – which are ¼ of the returns over 6% annualized (subject to high-water marks). I only get paid when you make money. When you win, I win. I am very bullish on the long-term future of Pabrai Funds – as demonstrated by my being the second largest investor in the funds. No fees were earned in Q3 2021.

I have an approximately $7.9 million investment in Dhandho Holdings. Additionally, The Dakshana Foundation has an approximately $0.8 million investment in Dhandho Holdings. Besides this, I have no other meaningful interests in any other mutual funds, hedge funds or private equity funds. Our interests are completely aligned.

Online Portal for Investment Statements

Your 12/31 investor statement have been uploaded to your investor portal. If you have trouble accessing your investor portal or need to reset your password, please contact Kimberly Engleman at ke@pabraifunds.com for assistance.

Our fund administrator, Liccar, has migrated all investor portals to a new platform. You should have already received a link from Liccar Fund Services to set up your new portal. If you did not receive your email invitation, or you are experiencing issues, please contact Kimberly as soon as possible.

Final K-1's (for US Investors)

For PIF2 and PIF4 investors, we expect your final K-1s to be uploaded to your portal in March 2021 by Liccar.

Annual Report – Will be out in Q2 2022

Our modus operandi now is to provide expansive commentary in the annual reports and the annual meetings. The quarterly letter will continue to provide updated performance numbers and announcements, but minimal commentary. The annual report is slated to be published in Q2 2022.

Chai With Pabrai Blog

Please check out my blog www.ChaiWithPabrai.com which I try to keep updated. With zero travel due to Covid, I have reduced my decline rate on speaking to students. I try to do 1-2 Zoom sessions with students every month. This is about the max. of what I am interested in doing. Here are some recent additions to the blog:

Q&A session with students at the University of Georgia - November 2021

I had a fun Q&A with students at the University of Georgia. We talked about my relationship with Warren and Charlie, sources for investment ideas and identifying moats.

Q&A session with students at the University of Georgia - November 2021

My Annual Talk at Boston College - October 14, 2021

I very much enjoyed my discussion with Prof. Arvind Navaratnam's class on Fundamental Analysis & Value Investing at the Carroll School of Management (Boston College). This was my 10th year of speaking to the students. We discussed a few investing frameworks, Tencent business model, and evolution of my investing style.

My Annual Talk at Boston College - October 14, 2021

Suggestion Box

We are always interested in hearing how we can better serve you. Please feel free to email me any suggestions/feedback you may have at mp@pabraifunds.com

2022 Annual Meetings – Tentative Dates

Covid-permitting, we are excited for the return of our in-person annual meeting in 2022! We intend to have two annual meetings held sequentially in 2022: an in-person meeting in Austin, Texas and a virtual meeting. These meetings will cover Pabrai Funds, Dhandho Holdings and Dhandho Funds.

The **In-Person Austin** meeting is tentatively scheduled to be held on **Saturday, September 10th, 2022** at 4:00 PM Central Time. The location will be determined and announced in this section of a future letter. Similar to our annual meetings pre-Covid, the Austin meeting will be followed by a cocktail hour with refreshments and light food served. We may also have a bike ride earlier in the day – stay tuned for more details!

Agenda for the Austin meeting:

4:00 – 4:30 PM:	Meet and Greet
4:30 – 6:30 PM:	Presentation and Q&A
6:30 – 7:15 PM:	Cocktail Hour

The **Virtual** meeting is tentatively scheduled to be held via video conference on **Saturday, September 24th, 2022** at 2:00 PM Central Time. Confirmed guests will receive instructions via email on how to attend the virtual meeting.

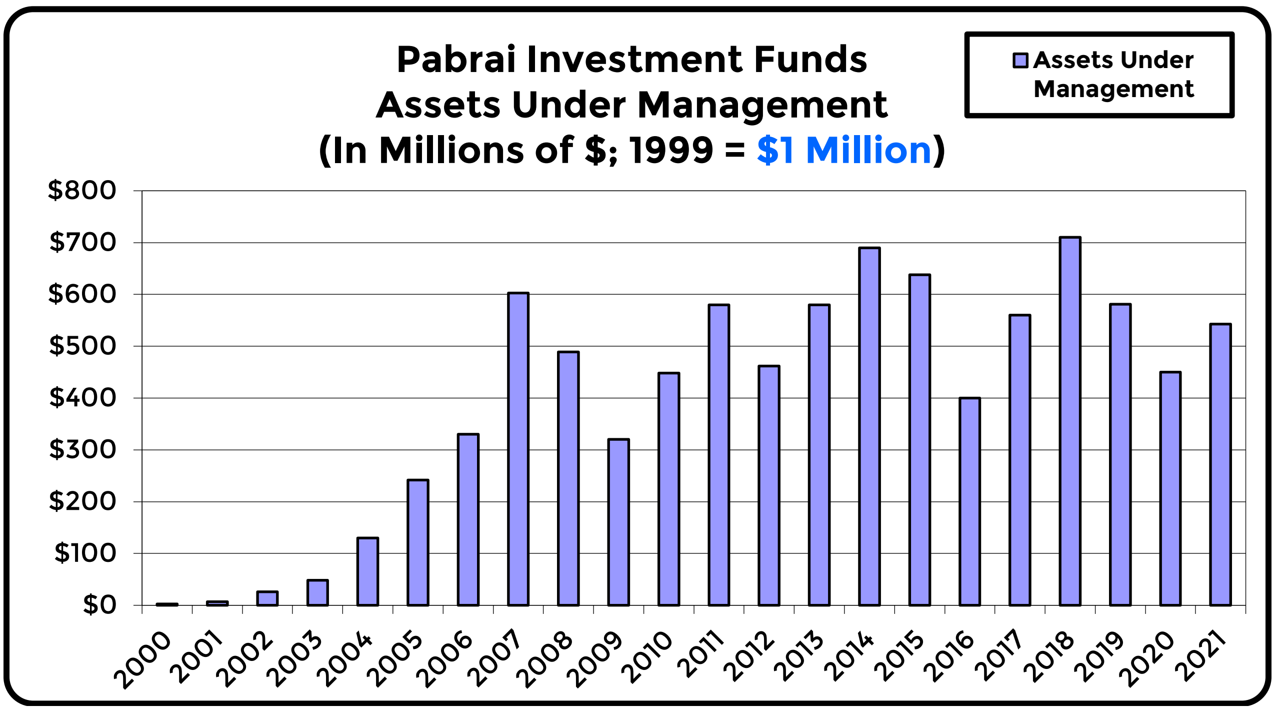
Agenda for the virtual meeting:

2:00 – 4:00 PM Central Time:	Presentation and Q&A

The invites will go out electronically via email in July 2022. Look for it in your inbox! If you don't receive it, please contact invite@pabraifunds.com. Your significant other and young kids are welcome to attend. As we are now a Registered Investment Advisor, the SEC requires that all guests must be "accredited investors," which includes your adult kids (22 years or older). The invitation is non-transferable. I look forward to seeing you in September.

Assets Under Management

There is $543 million in assets across all three funds as of December 31, 2021.



Thanks for your continued interest, referrals and support. Feel free to call me at +1512.999.7110 or email me at mp@pabraifunds.com with any queries or comments.

Warmly,

Mohnish Pabrai

Note: The assets under management in the above graph are as of June 30 for all annual periods. Various indices are included throughout this letter for reference. Reference to an index or benchmark does not imply that the strategy will achieve returns, experience volatility, or have other results similar to the index. As an example, the Funds may invest in foreign securities or fixed income instruments; however the indices presented only include U.S. securities. These indices are purely a basket of stocks, and the Funds may invest in securities other than stocks such as bonds, warrants and preferred stocks. The Funds typically hold fewer than 10 positions as compared to 500 in the S&P, 30 in the DJIA, and thousands in the NASDAQ. Therefore, the Funds are significantly more concentrated than the benchmark indices and may experience notably higher volatility and return characteristics from these indices.

Appendix A

Past performance is not indicative of future results. Returns are presented net of all fees and expenses, include the reinvestment of income and are calculated using a simple rate of return. The securities discussed do not represent all securities recommended for the Funds. It is also not a recommendation to buy or sell and one should not presume they will be profitable.

Please be aware that our past newsletters may discuss specific securities that have performed well without necessarily addressing those that have underperformed within our Fund(s). Readers should not infer that all investment decisions within the Funds were profitable.
