Date: July 15, 2025

Re: **Q2 2025 Letter to Partners**

Dear Partners:

For the quarter ended June 30, 2025, a total of $4.8 million was added to the various funds by new and existing partners. The additions on a per fund basis are:

PIF2: $0.45 million PIF3: $3.6 million PIF4: $0.75 million

PIF2 is the oldest fund and has been closed to new investors for many years. SEC rules limit PIF2 to a total of 100 partners and the fund currently has three open slots. PIF2 is open to US-based investors who are Qualified Clients. The minimum investment to join PIF2 as a new partner is $10 million.

PIF3 is our offshore fund for non-US accredited offshore investors, and U.S. IRAs, foundations, and endowments. The minimum investment to join PIF3 as a new partner is $10 million. PIF3 is closed to new and existing IRAs but continues to be open to US foundations/endowments and foreign investors. PIF4 is closed to new investors and is only open to additions from existing investors.

For existing investors in any of the funds, the minimum addition to their current investment is $25,000. Here are the deposit slips for PIF2, PIF3 and PIF4. If you are interested in or would like more information about the October 1, 2025 opening, please contact me at mp@pabraifunds.com or Kimberly Engleman at ke@pabraifunds.com. The updated performance numbers on all the funds are:

THE PABRAI INVESTMENT FUND II, LP (US Qualified Investors) Performance Summary:

	S&P 500	PIF2 (net to investors)
10/1/00-6/30/01	-14.0%	17.4%
7/1/01-6/30/02	-18.0%	35.3%

PIF2 Investors:

A $100,000 investment in PIFI at inception on July 1, 1999 and rolled over into PIF2 on 12/31/02 ($197,900) was worth $1,865,400 as of June 30, 2025 (net to investors). This equates to an annualized return of 11.9% since inception – after all fees and expenses. An investment of $100,000 in the S&P 500 on July 1, 1999 was worth $729,400 on June 30, 2025 – an annualized gain of 7.9%. The S&P 500 gains include reinvested dividends. In the graph above, the start date for PIF2 is shown as June 2000 for readability. The correct start date is October 2000.

PABRAI INVESTMENT FUND 3, LTD (Offshore/IRA Investors) Performance Summary:

	S&P 500	PIF3 (net to investors)

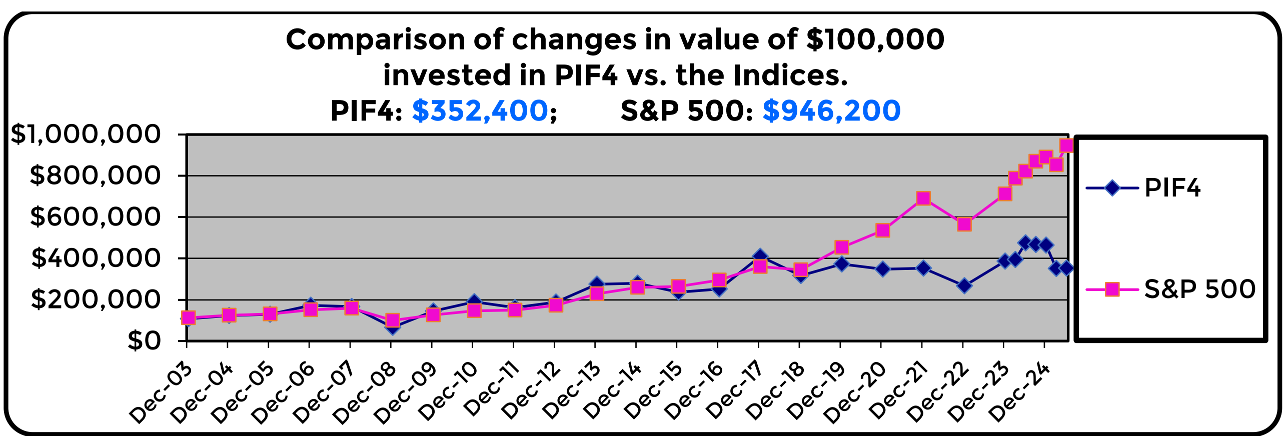
1/1/25-6/30/25	6.2%	-24.1%
Annualized	**10.9%**	**6.0%**
Cumulative	**846.2%**	**252.4%**



PIF4 Investors:

A $100,000 investment in PIF4 at inception on October 1, 2003 was worth $352,400 as of June 30, 2025 (net to investors). This equates to an annualized gain of 6.0% since inception. An investment of $100,000 in the S&P 500 on October 1, 2003 was worth $946,200 on June 30, 2025 – an annualized gain of 10.9%. The S&P 500 gains include reinvested dividends. In the graph above, the start date for PIF4 is shown as Dec 31, 2003 for readability. The correct start date is Oct. 1, 2003.

General Comments

For Q2 2025, PIF2 and PIF3 were down 2.3% and 6.8%, respectively, and PIF4 was up 0.4%, while the S&P 500 was up 10.9%. It was a volatile quarter for the market and our portfolio. It is worth noting that from July 1-15, the three funds are up 5% versus 1% for S&P 500. While the funds are down significantly (24-30%) in the first half of 2025, I believe the underlying intrinsic value of the portfolio is meaningfully higher in mid-2025 versus the beginning of the year.

Here are a few recent salient developments and observations across the portfolio:

Reysas Logistics and Reysas REIT (39% of overall AUM)

(40%, 52% and 20% of the AUM of PIF2, PIF3 and PIF4, respectively)

Reysas is our largest position and our highest conviction idea. It has already been a massive multi-bagger over the last six years that we have owned it. In my opinion, Reysas is still deeply undervalued. Reysas REIT has a liquidation value exceeding $2.5 billion versus a market cap of around $1.1 billion. Reysas Logistics owns 62% of Reysas REIT and, I believe, has an intrinsic value of around $2 billion versus a market cap of $810 million.

Both companies have recently begun buying back their shares. This is a significant development. While the quantity bought back has been small so far, the Rubicon has been crossed. Their top priority has always been to reinvest their cashflows back into the business at high rates – and I believe they have done a masterful job of that. If these reinvestment opportunities dry up, I expect buybacks to be front and center as long as the shares trade at a wide discount.

Due to recent changes in Turkish REIT laws, starting in 2026, both Reysas entities will be pushing out dividends. Thus, future cashflows will be split between dividends, reinvestment back into the business and buybacks.

Reysas REIT recently won a large government tender and acquired 870,900 sq. ft of industrial land for $50 million. I cannot think of any other entity in Turkiye with the competence and balance sheet to have been a serious bidder for this large parcel. It is ultra prime land, and it appears they got a good deal. I would expect unlevered returns on the warehouses they build on it to be north of 18%. This is an example of how, opportunistically, the Reysas founders aim to increase the intrinsic value of the business.

Land that is zoned for warehouses is in extremely short supply in and around Istanbul. This has led to rising rents and a strong appreciation of the value of Reysas' land bank and warehouses. Reysas' warehouses are 99+% leased on long term leases to a diverse range of blue-chip clients.

We do not have any plans to lighten up our Reysas position other than to meet redemptions. You can read all my past commentary on Reysas here.

TAV Airports (24% of overall AUM)

(22%, 23% and 29% of the AUM of PIF2, PIF3 and PIF4, respectively)

TAV is a diversified monopoly/oligopoly-type business with strong tailwinds. Our conviction in TAV Airports is almost as high as it is in Reysas. Because we were able to put in a lot more capital and it has a multi-decade runway of growth, we may end up owning TAV for a lot longer than Reysas, and it may make us a lot more money. I believe it is a first-class business run by a first-class management team.

There has been some recent good news from TAV. They reached an agreement with the regulator in Kazakhstan to proceed with $300+ million of capex at the Almaty Airport. In exchange they negotiated higher air traffic movement and passenger fees. The entire capex at Almaty will be done out of the cash flows that the airport generates.

The passenger fees at Almaty are among the lowest on the planet. The airlines are getting too good a deal! These fees will keep increasing as older deals with the various airlines expire and the new ones are executed at meaningfully higher levels. It may take until the 2030s before the passenger fees at Almaty are adjusted to "market rates."

The good news is that TAV produces over $100 million of free cash flow today at Almaty with the below market fees. Kazakhstan is a landlocked country (as large as Europe) with relatively high per capita GDP and strong population growth trends. Passenger growth is expected to be very strong for at least a couple of decades. This is mostly a fixed cost business with strong operating leverage. For example, when passenger volumes increase by 10%, costs may increase by perhaps 1%.

I estimate that Almaty's free cash flow is likely to keep growing at 10-15% a year for at least the next decade. It would not surprise me if free cash flow at Almaty is $400-600 million in a decade. There isn't much debt and tax rates are low. Almaty is just one of several crown jewels inside TAV. I hope we are smart enough to never ever sell TAV Airports.

You can read all my past commentaries on TAV here.

Our Met Coal Bets – Alpha and Warrior (17% of overall AUM)

(17%, 15% and 20% of the AUM of PIF2, PIF3 and PIF4, respectively)

The Australian Premier Low Volatility (PLV) met coal index has been very weak for the last year. Many met coal mines are losing money and there have been several mine closures. At least in the short run, mine owners will continue to produce met coal, if all their variable costs and some portion of their fixed costs are covered. Thus, many met coal mines are currently operating in the red. Alpha is one of them. It has also shuttered its highest cost mines and reduced output but continues to run most of its mines at a loss.

Warrior, on the other hand, has some of the lowest cost met coal mines on the planet. Its mines sit in the bottom quartile of the global cost curve. If Warrior's mines are running normally, the company is virtually guaranteed to be profitable. Both Alpha and Warrior have exceptional management teams.

It may appear that Warrior is the better bet and that may well be true. However, both have their positives and negatives. Alpha counters its higher cost operations with its balance sheet. The company has a stated objective of always running with a minimum $250 million cash cushion. This is designed to ride out lean times like we find ourselves in. In Q1 2024, Alpha started seeing market weakness and immediately ceased all stock buy backs. They had been using all the excess cash to buy back shares to the tune of $100-150 million a quarter.

In Millions	**Q3 2023**	**Q4 2023**	**Q1 2024**	**Q2 2024**	**Q3 2024**	**Q4 2024**	**Q1 2025**
Cash and Cash Equivalents	$296	$268	$269	$336	$485	$482	$448
Total Debt	$11	$16	$9	$9	$7	$11	$5
Net Cash	$292	$253	$260	$328	$478	$471	$443
Cash used for share buybacks	$102	$137	$116	$2	$0	$0	$5
Shares bought back	0.55	0.52	0.29	0.01	0.00	0.00	0.03

As you can see from the table above, Alpha's net cash peaked at $478 million in Q3 2024 and, even in this weak environment, their cash burn has been muted. This is due to the 2nd weapon in their arsenal. Alpha sells about 30% of its production domestically at prices that are fixed in Q3 of the previous year. For all of 2025, this 30% of production is being sold profitably and unaffected by weak index prices. The remaining 70% of Alpha's production is losing money. Domestic profits are partially offsetting international losses thus far in 2025. They have shuttered their highest cost mines and reduced output to further reduce losses. Alpha may exit 2025 with a war chest of over $350 million.

If these weak index prices persist, more mines will shut down globally. A good number of these mines may never ever reopen. There is an asymmetry between the closing and reopening of a met coal mine. When index prices are strong, equipment lead times can stretch into years, there is an acute shortage of miners and getting permits to reopen mines can be difficult. In addition, coal is a four-lettered word, and it is difficult to get debt or equity financing even in boom times. I believe a prolonged period of weak prices sets the stage for super normal profits subsequently. Alpha's balance sheet can handle at least a few more years of weak prices. It appears unlikely that the current met coal price weakness can persist endlessly in the face of continued mine closures.

Warrior on the other hand makes some money when prices are very weak and a lot of money in all other environments. The chink in its armor is that it is purely a long wall miner. Long wall mining is low cost, but any hiccup could hit 25% or more of its production in one go. Alpha has so many mines that any single mine is likely to have little impact.

In 2027 Warrior's Blue Creek mine will be fully commissioned. This may coincide with strong prices in 2027 and 2028. Warrior's 2028 cash flows are likely to exceed a billion. As a reminder, Warrior has a market cap of $2.7 billion. You can read all my past commentary on Alpha and Warrior here.

These three distinct bets cover 80% of the portfolio. We have an extremely concentrated portfolio, and I wanted to share this information, so you have a good understanding of what you own. These are not stock tips! My recommendation is to do nothing if your total exposure to all the three Pabrai Funds combined is below 25% of your net worth. If it is above that, you may want to redeem part of your interest on 12/31/25 to bring it below 25%.

I love what we own and think we are well positioned for robust gains in the years ahead.

Alignment of Interests

My immediate family has a stake of 167,886 units of PIF2 and 227,121 units of PIF4. The administrative team at Pabrai Funds and I own 42,917 units of PIF4 and 11,773 units of PIF3 in various retirement accounts. In addition, The Dakshana Foundation owns 86,246 units of PIF3. The aggregate stake of the Pabrai family, the Pabrai Funds team and The Dakshana Foundation in Pabrai Funds is worth approximately $42 million.

Pabrai Funds charges no management fee, just performance fees – which are a fourth of the returns over 6% annualized (subject to high-water marks). I only get paid when you make money. When you win, I win. I am very bullish on the long-term future of Pabrai Funds – as demonstrated by the fact that my family, together with entities that I control, are collectively the largest investor in the funds. No fees were earned in Q2 2025.

I have an approximately $4.2 million investment in Dhandho Holdings. Additionally, The Dakshana Foundation has an approximately $0.4 million investment in Dhandho Holdings. Besides this, I have no other meaningful interests in any other mutual funds, hedge funds or private equity funds. Our interests are completely aligned.

2024 Annual Report

The 2024 Annual Report of Pabrai Funds is on the website for your perusal.

New Bank and Wire Instructions for Subscriptions and Deposits

PIF2, PIF3 and PIF4 have all changed the bank that they use to accept incoming wires for new subscriptions and additional deposits from Northbrook Bank & Trust (Wintrust) in Chicago to Horizon Bank in Austin, Texas. As a result, the wire instructions that you will use to wire your contributions to any of the three funds have now changed to the Horizon Bank instructions. **Please do not use the Wintrust instructions anymore as those accounts are closed.** The Horizon instructions have all been updated on all our subscription agreements and deposit slips. If you have any questions or need any assistance, please do not hesitate to contact Kimberly Engleman at ke@pabraifunds.com.

Online Portal for Investment Statements and Audited Financials

Your 6/30 investor statements and the latest audited financial statements for each Fund have been uploaded to your investor portal. If you have trouble accessing your investor portal or need to reset your password, please contact Kimberly Engleman at ke@pabraifunds.com for assistance.

Firm Brochure, Brochure Supplement, and Privacy Notice:

The latest versions of Part 2A of our Form ADV (i.e., our Firm Brochure), Part 2B of our Form ADV (i.e., our Brochure Supplement), and our Privacy Notice can be found in the legal tab of our website: Legal.

Annual Redemption Date Only for Retirement Account RMDs

We have an annual redemption date on September 30th only for retirement accounts invested in the PIFs in which the beneficial owner is 73 years or older. The purpose of this is to allow folks who are 73 years or older and who are invested in the PIFs with retirement assets to meet their annual RMDs. These investors can also still redeem whatever they wish on 12/31 with 60 days' advance notice.

We recommend that these folks make their first redemption request with the next 5 years in mind and redeem 20% of their balance. They can then keep those retirement funds in cash or a low-cost index fund with daily liquidity (e.g., an S&P 500 index fund with their broker/custodian) and tap that annually for RMDs as needed. Then, each year, they can redeem an additional 3.5% - 7% to make sure that they have sufficient funds for RMDs at all times.

We need to receive the redemption request with 60 days' advance notice (i.e., by August 1st). Please nudge Kimberly Engleman at ke@pabraifunds.com if this is of interest and she will provide you with a redemption request form.

Suggestion Box

We are always interested in hearing how we can better serve you. Please feel free to email me any suggestions/feedback you may have at mp@pabraifunds.com.

2026 Annual Meeting

There will be two annual meetings held sequentially in 2026: an in-person meeting in Austin, Texas and a virtual meeting. These meetings will cover Pabrai Funds, Dhandho Holdings and Dhandho Funds.

The **In-Person Austin** meeting is scheduled to be held on **Saturday, April 11th, 2026** at 4:00 PM Central Time at:

St. Edwards University
John Brooks Williams Science Center South
3001 South Congress, Austin, Texas 78704-6489 Tel: +1 512-448-8400

St. Edwards has a beautiful campus lined with 100-year-old Texas live oak trees and is only 10 minutes from downtown Austin. It is also a 10-minute drive from Austin-Bergstrom International Airport (AUS).

There are many hotels and Airbnbs in downtown Austin, and cheaper options 10-15 miles out.

Agenda for the Austin meeting:

4:00 – 4:30 PM: Meet and Greet
4:30 – 6:30 PM: Presentation and Q&A
6:30 – 7:15 PM: Cocktail Hour

The **Virtual** meeting is scheduled to be held via video conference on **Saturday, April 18, 2026,** at 1:00 PM Central Time. Confirmed guests will receive instructions via email on how to attend the virtual meeting.

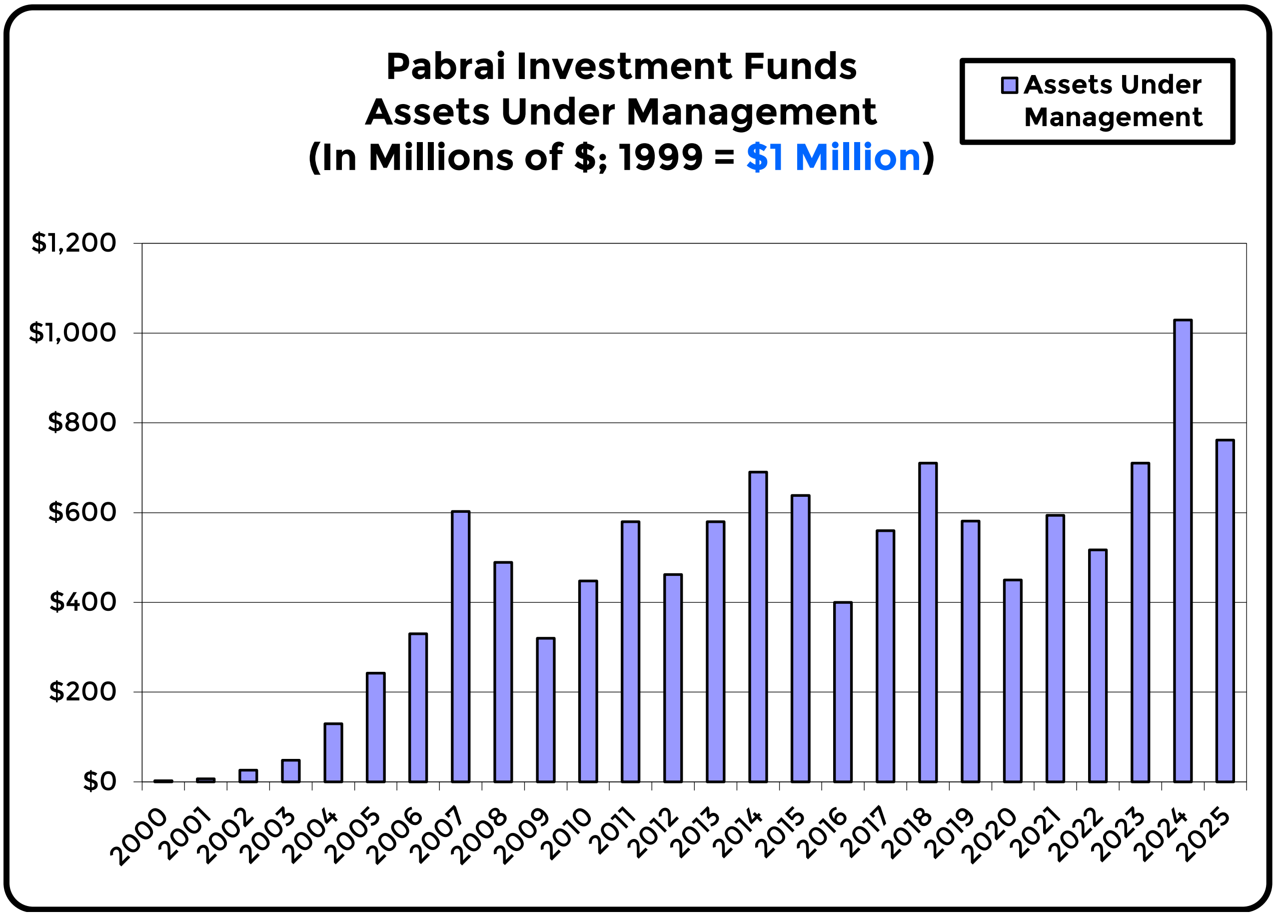
Agenda for the virtual meeting:

1:00 – 3:00 PM Central Time: Presentation and Q&A

The invites will go out electronically via email in January. Look for it in your inbox! If you don't receive it, please contact invite@pabraifunds.com. Your significant other and young kids are welcome to attend. As we are a Registered Investment Advisor, the SEC requires that all guests must be "accredited investors," which includes your adult kids (22 years or older). The invitation is non-transferable. I look forward to seeing you in April.

Assets Under Management

There is $762 million in assets across all three funds as of June 30, 2025.



Thanks for your continued interest, referrals and support. Feel free to call me at +1512.999.7110 or email me at mp@pabraifunds.com with any queries or comments.

Warm regards,

Mohnish Pabrai

Note: The assets under management in the above graph are as of June 30 for all annual periods. Various indices are included throughout this letter for reference. Reference to an index or benchmark does not imply that the strategy will achieve returns, experience volatility, or have other results similar to the index. As an example, the Funds may invest in foreign securities or fixed income instruments; however the indices presented only include U.S. securities. These indices are purely a basket of stocks, and the Funds may invest in securities other than stocks such as bonds, warrants and preferred stocks. The Funds typically hold fewer than 10 positions as compared to 500 in the S&P, 30 in the DJIA, and thousands in the NASDAQ. Therefore, the Funds are significantly more concentrated than the benchmark indices and may experience notably higher volatility and return characteristics from these indices.

Appendix A

PIF2's Performance History (Net to Investors)

Important Disclosures:

Past performance is not indicative of future results. Returns are presented net of all fees and expenses, include the reinvestment of income and are calculated using a simple rate of return. The securities discussed do not represent all securities recommended for the Funds. It is also not a recommendation to buy or sell and one should not presume they will be profitable.

Due to the high concentration in a small number of holdings, each Fund's performance may be hurt disproportionately by the poor performance of one or only a few stocks.

Before making any investment decision, consider whether it is suitable for you and consider seeking advice from your own financial or investment adviser.

Please be aware that our current and past newsletters may discuss specific securities that have performed well without necessarily addressing those that have underperformed within our Fund(s). Readers should not infer that all investment decisions within the Funds were profitable.
