

This week's theme:

The return of ED

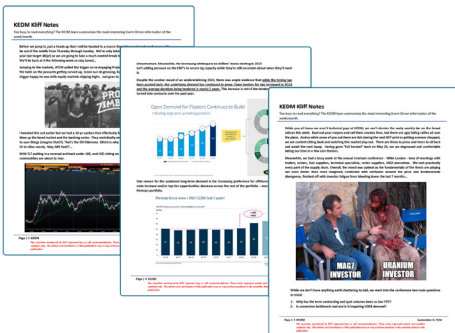

August 2, 2026

Volume #284

Dear Reader,

We realize that the size of KEDM may be intimidating—it shouldn't be. We have broken it down in 3 chapters: Thematics, Kliff Notes, and Event-Driven Monitors.

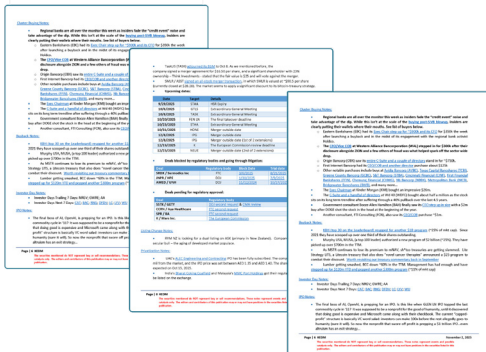

KEDM works whether you've got 2 minutes or a weekend. We hope you find it as valuable as we do!

Start here:

KEDM Thematics

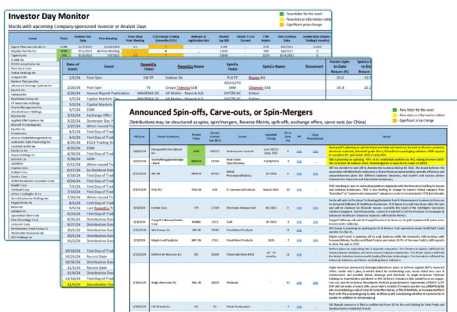

Our weekly deep dive into a big picture theme or macro event.

Then:

KEDM Kliff Notes

Here, we flag what we consider to be the most interesting events of the week.

Go deep:

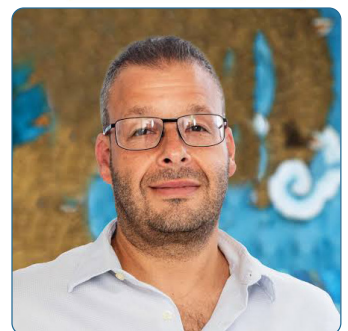

Event-Driven Monitors

And finally, 25+ monitors with direct links to sources: press releases, SEC filings, and investor decks.

THEMATICS

Our weekly deep dive into a big picture theme or macro update

Discipline!

Before we get started, what a difference a couple of weeks can make...

Last week, we did a deep dive into Japanese activism and introduced our dedicated Japan monitor. We also mentioned 2 ways to play the improvement in Japanese corporate governance that were easy enough for a gaijin to wrap your head around: Integral KK and Hikari Tsushin. Check it out if you haven't already.

We also wrote about the catch-up potential of Emerging Markets as inflation and rate-hike fears ease. Specifically, we revisited our Macau Casino theme, noting that their stocks had sold off on the back of a soft June. The world was busy watching the World Cup, and Macau visitor rates suffered.

Thematics

Our weekly deep dive into a big picture theme or macro update

2 weeks later, the World Cup has ended, and Macau Casinos are rebounding. Will the rebound last? Who knows. But casino stocks are up about 15% amid improving visitor rates. The valuation of mature companies isn't supposed to fluctuate by 15% based on what's on television. We're kicking ourselves for playing this too small. We never believed market moves would be this predictable.

Investing is supposed to be hard. We've been humbled by the market more often than we can remember. But today's trades seem more obvious than usual.

The highest quality companies are for sale because why would anybody care about a stable 15% growth per year if AI companies can go up 15% in a day?

As value investors, we tend to be drawn to mediocre business models with shitty management teams and a risky turnaround plan.

It makes us feel smart if we predict a successful turnaround and buy into it just before the market catches up with what is happening.

But in this market, being a quarter too early means you will lose 30% on a minor earnings release. Being a few quarters early, and your stock will go down enough to ruin your quarter.

So why not take advantage of the selloff in quality? If quality companies are for sale, why put up with an undercapitalized small-cap with a CEO who never delivers on his promises? Some companies have been compounding at double-digit rates for decades. They are founder-led. They dominate their industry. And if you put some effort into picking the right ones, you can underwrite IRRs well north of 20% without requiring any rerating.

The Compounder Bros have been over them for the last 10 years, but more recently their fortunes have turned. Their performance has lagged. They are no longer the hottest fund in their firm. Their CIO no longer asks the compounded bros for a market overview during the weekly all-hands meeting. Instead, tech investors are now being asked for their opinions, and the quality guys are suddenly seated in the back next to the credit guys.

Thematics

Our weekly deep dive into a big picture theme or macro update

Many of our friends who used to fall firmly in the quality bucket have recently rebranded as bottleneck investors. They're telling us that memory is no longer cyclical, and even if it is, "we'll always need more chips."

Nothing could better mark this transition than Fundsmith selling its quality companies to join the MoMo crowd.

So our goal for the year is to be the most disciplined investor. Trying to be too smart is a risky business. Instead, we'll only get involved in trades that feel obvious. And there are plenty of those.

What does that mean for our positioning? We have been adding names to our compounder theme recently and will continue to do so over the next few weeks. We've made no secret of our holdings in Stryker, Adyen or Tencent. These are all names that in any other year would have been considered too boring to even talk about in a newsletter.

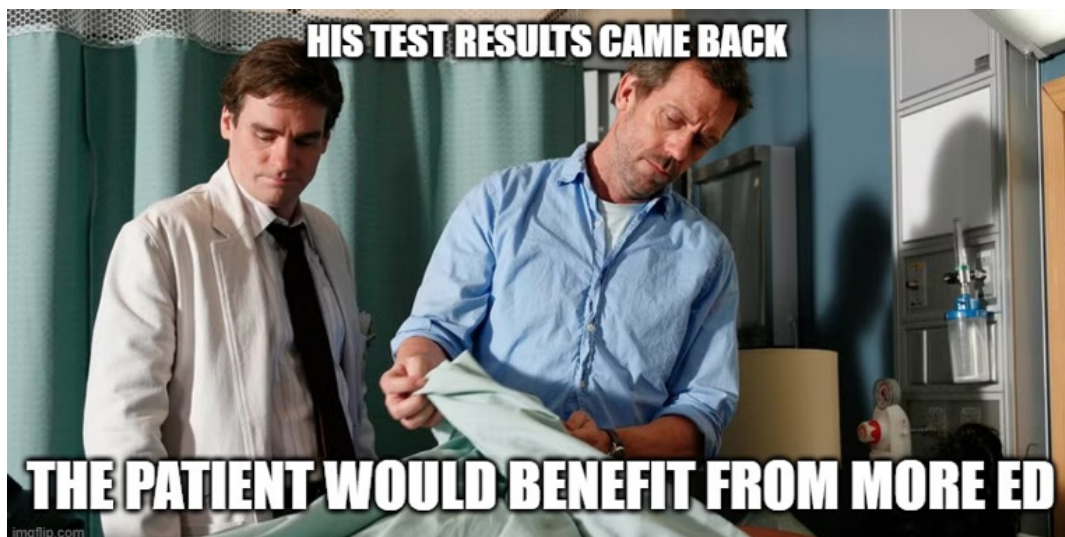

Of course there is our thematic book. We introduced many new themes over the last year, and we are in the process of updating you on all of them. But it goes without saying that our long vol basket, trade schools, refiners, aerospace aftermarket, and payment companies are among our more popular themes.

Thematics

Our weekly deep dive into a big picture theme or macro update

The Return of ED

But the biggest change is that we have also been making significant additions to our event-driven book.

Take spinoffs as an example. For the last five years, corporate America seemed to have been taking advantage of the market's willingness to take Spincos off their hands. They would take the business that most resembled a melting ice cube, stuff it with some legacy liabilities, and let the SpinCo pay a major dividend to Remainco. Spincos were set up for failure.

Just to name a few: Organon, Embecta, Vestis, and Loyalty Ventures were so indebted that they never stood a chance, given the need to reinvest in their business.

But the businesses that have been hitting the market more recently are sort of ok. We recently wrote up Spincos and shared our opinions on MBGL, HONA, OCTV, and MFP.

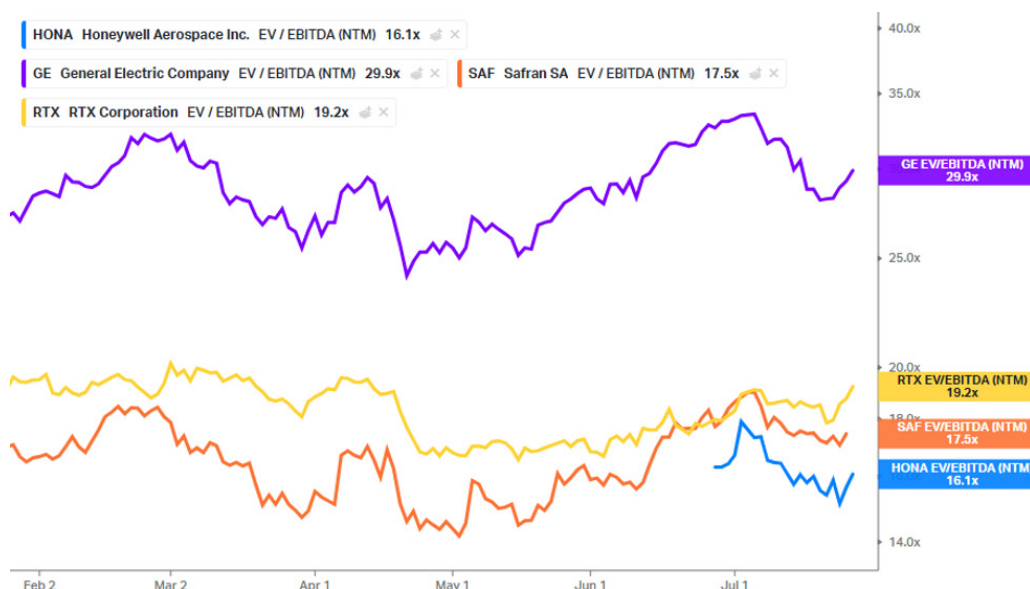

None of them are "guaranteed multibaggers with no downside" (that's what we tell our investors we are usually after).

But **Honeywell Aerospace (HONA)** at ~22x P/E seems interesting. You know our opinion on aerospace and defense. HONA serves both. They are guiding for HSD growth over the next few years, but they've been growing at double-digit rates given the strong industry tailwinds. Admittedly, the last 2 quarters have fallen short, but as a stand-alone company with a little more focus, we see no reason they would underperform their peers, who are all growing in the double digits at the moment.

Thematics

Our weekly deep dive into a big picture theme or macro update

Especially their #1 position (65% market share) in Auxiliary Power Units is a high-quality business with lots of future after-market revenues.

Then there is **Mobility Global (MBGL)**, which was separated from S&P Global because of limited strategic fit with the rest of the organization. It's a data business best known for its Carfax brand, which maintains reports on all cars currently in circulation. Invaluable information if you want to know the history of a used car before a sale, but also a brand that provides legitimacy to any car dealer that partners with them.

Meanwhile they have other B2B solutions that help OEMs with the pricing and positioning of new cars (e.g., if you drop the horsepower of your engine, how would that impact sales), or help dealers with targeted advertisement (e.g., whose car has just gone off lease or who's got positive equity on their car and who might be in the market for a new car?).

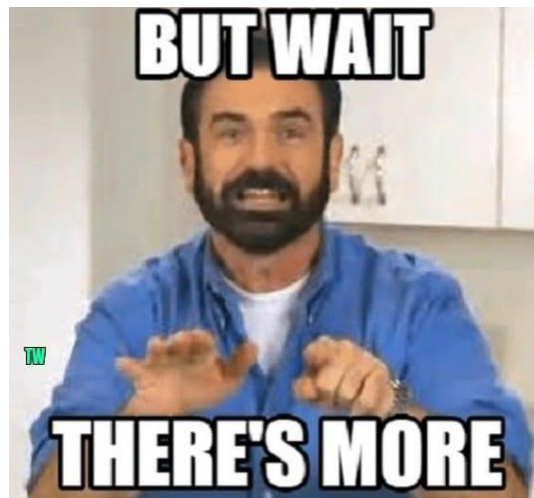

Of course, the fear is that anything that's data will be easier to copy in an AI-dominated world. In reality, if data is proprietary – like data that is shared with MBGL through their partnership with second-hand dealers or repair shops – the data becomes more valuable because AI helps turn the data into solutions.

Management believes MBGL is a 7-10% growth asset with margin expansion on top. Such an asset should not trade for 13x 2027 FCF, not even if management gets a little greedy by boosting SBC, which adds 1% dilution per year.

As we said, neither MBGL nor HONA is a near-term multi-bagger. But we do think they will rerate higher over the next few quarters as forced selling abates, sell-side analysts initiate coverage, and more buy-side analysts familiarize themselves with the business. We carry them at ED weight.

Thematics

Our weekly deep dive into a big picture theme or macro update

But even bankruptcy emergence is making a comeback. This monitor has been by far the most alpha-rich. Why do post-bankruptcy companies perform so well? The reasons are multifold.

Companies generally emerge from Chapter 11 with a cleaner balance sheet. The first weeks or months of trading can see selling pressure, as not all creditors who have received equity can hold their newly received shares within their mandate. Also, during the bankruptcy process, the company often downplays its earnings potential to improve its bargaining position with creditors. Some legacy liabilities, such as expensive leases, might be canceled. Finally, many industries are cyclical, and by the time a company emerges from a prolonged bankruptcy process, the cycle might already be turning.

Thematics

Our weekly deep dive into a big picture theme or macro update

This brings us to **Office Properties Income Trust (OPI)**, an externally managed REIT of Class B/C office properties, where mismanagement and self-dealing by the external manager, RMR, are widely considered to have played a crucial role in the company's demise. RMR's continued involvement is often cited as a good reason not to get involved. We are not here to disagree, but we would like to point out the following.

First of all, OPI trades at roughly a 10% cap rate, which seems fair for an overleveraged office portfolio. But it ignores almost 30 properties that are operating at break-even or are loss-making. We expect the company to announce a disposal program, in which case non-accretive assets might suddenly be worth something. We won't argue that break-even assets should sell for a lot; at least 2 assets (20 Mass Ave in DC and 2 buildings on Elliott Ave in Seattle) are vacant because of recent modernization.

The other point is that the management agreement with RMR clearly puts the ex-creditors in charge. Except for their seats on the BoD, the management agreement pays RMR only a fixed \$14m per year, and it can be terminated at no cost after 2 years (or immediately upon payment of the remaining management fee for the 2-year term).

Have office values bottomed? We don't know. It wouldn't be hard to find data showing offices are stabilizing, but at the same time, we feel like that's nothing a little bit of AI overinvestment can't change.

In conclusion, we've had a good first half of 2026, and we intend to take advantage of some of the mispricing we are seeing in quality companies. We continue to be invested in our core themes and have recently begun meaningfully adding to our ED basket.

Remember, ED positions are not intended to all be home runs. The point of ED is to hit a lot of singles. And we believe many of those opportunities are emerging, which we will continue to flag in our monitors.

With that, over to the events of this week.

KLIFF NOTES

Interesting event-driven actions that caught our attention

Fallen Angels:

- Removing **Janus Group (JBI)** from our monitor. This is cheap on normalized earnings. However, the housing market, and by extension the self-storage market, isn't normalizing. Q1 also showed margin pressure, and we doubt that the return of inflation in Q2 is helping on this front.
- Meanwhile, **Reddit (RDDT)** is firing on all cylinders. Well, almost all. Despite growing at >60% for 8 straight quarters, helped by improved monetization, daily average users (DAU) in the US saw a slight (0.6% QoQ) step back. The market hates it. Google search now often ends with an AI-generated answer (for which Google pays RDDT) instead of sending people to Reddit. Meanwhile, the die-hard RDDT scrollers who spent an hour discussing cat pictures for Karma continue unabated. Is this really trading at a low 20s GAAP P/E and mid 10s FCF (helped by SBC)? Unlike META, RDDT doesn't spend any on Capex; it just plows all that FCF right back into share repurchases. Potential catalysts: RDDT is high on the list (though behind BE) for S&P500 inclusion, and in H2 they should renegotiate their data license agreements with OAI and Google.

Spin Notes:

- **HF Sinclair (DINO)** will split its Lubricants & Specialties segment into a new publicly traded company, while retiring its Canadian base-oil refining assets in 2027. The aim here is to create a capital-light, higher-FCF business with outsourced base-oil supply via new strategic agreements, so leaving the group as a more focused, cash-generative downstream operator across refining, midstream, marketing and renewables. Will take 12-18 months to complete. Big and in volatile end-markets – on the watchlist.
- The spin of the smaller UPM Plywood units is progressing, with **UPM-Kymmene (UPM FH)** first time reporting it as discontinued operations (that's the IFRS way). The spin is still on track for Oct 31. This thing might be interesting, given its quite small size and a different business from the rest of the business. Adding to that, basically every unit (roughly 6) is sucking at the moment. We could see a REALLY big dump in the shares here.

Buyback Notes:

- **FirstSun Capital Bancorp (FSUN)** popped a \$150m buyback, ~8% of the current market cap. Still trading at ~8x PE on 2027e despite continued strong growth and solid execution.
- Flagging **Zegona (ZEG LN)**, which looks interesting at these levels. A roughly €8bn EV, almost €800m in operating cash flow and a credible path to €1bn in a couple of years on visible lsd growth on top of a bunch of cost savings / efficiency measures kicking in. No taxes given plenty of NOLs, interesting upside optionality (eg Ranco), strong management alignment. And a 15% buyback incoming. Could see >100% upside based on normalized yield assumptions alone.

Golden Handcuff Monitor:

- **AAR Corp (AIR)** just granted CEO John Holmes a special one-time performance equity award of 161,500 shares, separate from his regular annual LTI, with vesting tied entirely to stock price targets. The backdrop for the grant is just strong: record FY2026 results, 19% revenue growth, a 12.1% adjusted EBITDA margin, and net leverage already down to 2.03x after integrating multiple acquisitions. That context makes the \$ 175, \$200, and \$250 hurdles more credible. AAR remains our preferred way to play the aerospace after-market theme.

CEO Turnover Notes:

- **Stride's (LRN)** CEO James Rhyu seems to be [getting canned](#) and will be replaced by old-timer Robert Knowling. Is the 71-year-old CEO the right person to run a company that's struggling with tech implementations, or is he better suited to manage relations with school boards? To calm the markets, LRN pre-released earnings in line with expectations, but they failed to comment on enrollment figures, which spooked markets. This has been a volatile name. If they guide to a return to growth in Q1, this should re-rate from the 9x FCF it currently trades at. If for some reason enrollments decline because parents are holding a grudge after a year of tech issues, watch out below. Operating leverage is very strong here. Mr. Knowling's contract includes a change-of-control provision.

13D and Activist Notes:

- **Soken Chemical (4972 JP)** recently adopted an anti-takeover policy in response to Axiom Cap's aggressive increase in its stake. Soken mentioned that Axiom had not adequately explained its intentions. Meanwhile, the shares dropped quite a bit, with Axiom probably saying 'thank you'. Soken is back to growth while also boosting operating margins to new highs. Solid FCF generation and over 40% of its market cap in current assets (mostly cash) net of total liabilities. ~12x LTM PE.

Merger Notes:

- The engineering company **Arcadis (ARCAD NA)** rejected WSP's (WSP CN) second offer of €51.50. No surprises here, with Arcadis pretty much highlighting what we flagged before: implied valuation below peers, cultural fit issues, new strategy, and that a deal would need support from the foundations that hold 20%+, etc. But this does put more eyes on the interesting Arcadis story, with the company not having a great track record of execution (said kindly). Let's see if **Jacobs Solutions (J)**, **Aecom (ACM)**, or **AtkinsRealis (ATRL CN)** will get involved.
- **Upcoming dates:**

Date	Target	Details	Spread
08/04/26	IPF LN	Merger completion date	0.2%
08/05/26	AXTA	Tender offer expiry	28.1%
08/05/26	AXTA	Shareholder vote date	28.1%
08/06/26	ITRK LN	Court Meeting and the General Meeting	2.7%
08/10/26	IMXI	Merger outside date (2nd of 3 extensions)	33.3%
08/14/26	RMAX	Shareholder vote date	(9.1%)
08/17/26	EVOK LN	Court Meeting and the General Meeting	17.0%
08/18/26	TXNM	Merger outside date (1st of 3 extensions)	5.8%

Listing Changes Notes:

- **Uranium Royalty (UROY)** completed its (asset) deal with Sweetwater Royalties. This was quite the big deal for UR, not only in size (\$1.9bn in EV and roughly \$1.1bn in equity acquired, vs C\$490m EV and C\$600m market cap for UROY), but also because it will drastically reduce exposure to just one main commodity. The company recently listed on the Nasdaq and delisted from the TSX. In short, a transformative acquisition (trona is an interesting commodity) which should help the valuation. BB is not yet showing the correct financials, and coverage is picking up.

Strategic Alternatives Notes:

- In a win for the activists, **SEACOR Marine (SMHI)** has launched a strategic review, looking for value-maximizing transactions – tough, clearly preferably a full sale. This comes after a ton of pressure from Pointillist (the largest shareholder), which argued SMHI's market cap massively undervalues a fleet. Their thesis: the offshore cycle has fully recovered, but SMHI's equity still trades at well below its \$22/share broker-appraised value. Seacor remains weighed down by high interest costs, G&A expenses, and subpar utilization, forcing asset sales to bolster liquidity. The premium PSV fleet alone should be worth ~\$11/share, with FSVs and Middle East liftboats pushing embedded value to \$15/share+, vs. ~\$9.5 today.
- **Valmet (VALMT FH)** launched a strategic review to assess whether it makes sense to split the company into two listed businesses, separating its Biomaterial Solutions and Process Performance Solutions units. Spoiler alert: it makes a lot of sense. This thing has long carried a large holdco discount, with one unit (PPS) growing nicely (dd topline growth + solid margin expansion), while the other just being a big drag. While the shares moved strongly on the news, they are just back at levels of a few months ago. The group is trading at ~8x forward EV/EBITDA – that won't be the case for each unit separately. Keep an eye on it.

Demutualization Notes:

- **CSB Financial (CSBA)** completed Community Savings Bank's mutual-to-stock conversion and IPO on July 29, 2026, raising approximately \$13.8 million through the sale of 1.38 million shares at \$10.00 per share, with the stock starting to trade on the OTCQB on July 30, 2026.

Index Addition / Deletion Notes:

- **Five9 (FIVN)**, **ADI Global (ADIG)** are set to join the S&P SmallCap 600, and **Ferguson (FERG)** is set to join the S&P 500, replacing **Two Harbors (TWO)**, **Hertz Global (HTZ)**, and **Electronic Arts (EA)**, respectively. FERG is a great example of how UK-to-US listing changes can create significant value for shareholders.

CVR Notes:

- The drama continues at life sciences company **Seer (SEER)**, with minority holders Radoff-JEC raising their offer for the nth time (now to \$2.55 p/s plus a CVR), and another hike as well from the CEO (\$2.45 p/s and two CVRs). Shares still at \$2.21.

- Tiny, but perhaps interesting for some of you. **Neuphoria (NEUP)** will be acquired by Scancell in an all-share merger, resulting in a Nasdaq-listed Scancell (SCLT) alongside Scancell's AIM listing. The current ratio implies \$4.55 per NEUP share (~16% gross spread), plus a few CVRs tied to several milestones. partnered-asset milestones. The deal is paired with up to \$89m of new financing, plus \$10m of Neuphoria cash, to fund Scancell's Phase 3 ISCIB1+ lead melanoma trial through key readouts into 2029.

Investor Letter Notes:

- [Pangolin Asia Fund](#) thinks the consensus on ASEAN markets is too gloomy, yet ASEAN markets are growing faster than most of the world and simply aren't priced in. The fund had a write-up on **Allianz Malaysia (ALLZ MK)**, which is 63% owned by Germany's Allianz. It is Malaysia's largest general insurer, trading at a 7.6x PE multiple, largely due to low trading volume.
- [Moon Capital Management](#) added **Zoetis (ZTS)**. This world-leading pure-play animal health company has traded above x30 earnings for much of the past decade, yet, due to concerns about companion-animal growth, the stock is now trading at x11 times earnings. The fund believes the current price significantly understates the business's quality, durability, and long-term earnings power.
- [Merion Road Capital](#) is bullish on the recent spin-off, **Honeywell Aerospace (HONA)**, stating that the stock is trading below its peers and that the conservative guidance management deliberately set could be easily cleared.
- Another post-spin and ED action: **AnaptysBio (ANAB)** is an asset-light royalty company that collects royalties on sales of Jemperli, a fast-growing cancer drug commercialized in partnership with GSK. But the story doesn't end here. ANAB accused GSK of violating its commercial agreement, and, depending on the outcome of the trial, [Laughing Water Capital](#) thinks the shares could be worth \$300. Summers Value Fund also identified two scenarios: a) higher profit for ANAB in the future, b) ANAB getting acquired. The July court hearing didn't reach any settlement, and the [post-trial argument](#) is scheduled for Oct 20.
- Nicotine Pouches are one of the trends we are monitoring, and KEDM friend [Caro-Kann Capital](#) had a write-up in its Q2 letter on one of the main players: **Haypp Group (HAYPP SS)**, the largest retailer of nicotine pouches. The fund stated that a) operational scale; b) strong SEO ranking; c) strong relationship with manufacturers create the moat for its business.
- Speaking of the trends we eyeball, [Palm Harbour Capital](#) briefly mentioned a trend with senior living facilities in its Q2 letter that the average daily patient count at **LNA Sante (LNA FP)**, a nursing home in France, had increased and that the hospital-at-home model is rapidly becoming the company's key profitability driver.

Other Interesting ED Actions (but that doesn't have a separate monitor):

- A positive pre-NDA meeting with the FDA for **Abivax (ABVX)** for its banger drug odefazimod, with an NDA filing on track by year-end 2026. Yet another positive step in the right direction. Meanwhile, the shares are trading at levels that fully ignore the recent positive maintenance data (with the cancer scare now fully debunked) and the >\$900m more cash now in the pocket.
- **Aecon (ARE CN)** is an interesting sit that seems close to completing its transition from a messy sit into a recurring growth, with legacy problem projects (Toronto LRTs, Gordie Howe) now resolved. The mix has shifted toward nuclear and utility, now ~50% of EBITDA, and US comps are trading at far higher multiples. A big \$1.7bn data-center contract adds a ton of EBITDA over 2027–2029, making Aecon an interesting AI-infrastructure beneficiary. At ~10x forward EBITDA, this is quite lower vs peers.
- Now that **SES (SESG FP)** dropped on recent results, a reminder that SES is set to receive total incentive payments of \$5.6bn in 2030–31 from the release of the 160 MHz of US upper C-Band spectrum. This is still pre-tax and fees, but on a \$10bn EV and \$2.8bn market cap, still nice. Good one for the watchlist.

RDDT	Reddit Corp	7/31/2026	Reddit, Inc. oversees an internet-based service dedicated to fostering diverse online communities. This platform categorizes groups by shared passions, enabling its users to participate in dialogues through recounting experiences, sharing external web addresses, uploading visual and video content, and engaging in direct replies.	-37%	27,080	-930	41,914	Reddit (RDDT) is firing in all cylinders. Well, almost all. Despite growing at >60% for 8 straight quarters, helped by improved monetization, daily average users (DAU) in the US saw a slight (0.6% QoQ) step back. The market hates it. Google search now often ends with an AI generated answer (for which Google pays RDDT) instead of sending people to Reddit. Meanwhile the die-hard RDDT scrollers who spent an hour discussing cat pictures for Karma continue unabated. Is this really trading at a low 20's GAAP P/E and mid 10's FCF (helped by SBC)? Unlike META, RDDT doesn't spend anything on Capex but just plows all that FCF right back into share repurchases. Potentially catalysts: RDDT is high on the list (though behind BE) for S&P500 inclusion and in H2 they should renegotiate their data license agreements with OAI and Google.
PCG	PG&E Corp	6/7/2026	PG&E Corporation operates as a holding company. The Company, through its subsidiaries, provides electric and natural gas distribution operations, electric generation, and natural gas transmission and storage services. PG&E serves electric and natural gas retail customers in northern and central California.	-7%	46,580	60,622	95,928	The key potential regulatory catalyst is a follow-on to California's 2024 wildfire legislation, Senate Bill 254 (SB 254). SB 254 directed the California Earthquake Authority to study permanent solutions to utility wildfire liability, and the resulting proposals include granting utilities a safe harbor if they comply with approved wildfire mitigation plans, capping damages, socializing wildfire costs, or even creating a state-backed wildfire insurance system. Any legislation implementing these recommendations would further reduce PG&E's wildfire liability risk and could lead investors to value the company more in line with other regulated utilities. There is clear option value in PCG, which at 10x P/E the market doesn't price.
700 HK	Tencent Holdings Ltd	5/22/2026	Tencent Holdings Limited is a holding company. The Company provides services including social network, music, gateway websites, e-commerce, mobile gaming, payment system, entertainment, artificial intelligence and technology solutions through its subsidiaries. Tencent Holdings serves customers worldwide.	-31%	546,070	32,963	656,271	China's big tech has been in the doldrums all year, with forced selling for mainland Futu/Tiger customers bringing an estimated 350b HKD in net outflow. Tencent (700 HK) now trades well below 10x earnings when adjusting for their investment book. They might not have the coolest AI model but they still have distribution into 1.4 billion customers, with many ways to monetize this for decades to come.
FUTU	Futu Holdings Ltd	5/22/2026	Futu Holdings Limited operates as a holding company. The Company, through its subsidiaries, offers an online brokerage platform that enables individual investors to trade in listed stocks. Futu Holdings serves customers in the United States, China, and Hong Kong.	-49%	14,670	-106,176	71,860	Chinese stockbrokers FUTU (FUTU) and Up Fintech (TIGR) are taking a beating after the Chinese securities regulator forces all unauthorized Mainlanders to close their accounts within 2 years, with only sell orders and fund withdrawals allowed. Both companies will be fined, but a rumored 1.85b CNY fine for FUTU is less than 2 months of profit. For FUTU, mainlanders are 13% of accounts but closer to 20% of total assets and revenue. FUTU's rapid growth in HK and SE Asia has diversified the business away in recent years, and the loss of Chinese customers is less than 1 year of customer growth outside of China. What remains is a faster growing, HK / SE Asia consumer play with no China risk, which probably trades at 8x P/E with net cash. That is, if this was the last shoe to drop and Mother China isn't intent on ruining them. Update 5/28: FUTU leaning into buyback. Q1 weak but customers YOLOing into memory stonks in Q2. Update 6/3/2026: Mainland customers will not face forced closure but can still trade when physically abroad.
LRN	Stride Inc	2/22/2026	Stride, Inc. is a technology-based education company. The Company offers proprietary curriculum, software, and educational solutions created for online delivery to students in kindergarten through 12th grade and K-12.	-51%	3,414	-233	6,016	LRN is part of a duopoly with Pearson that operates virtual public schools. Customers are charter schools and school districts who pay LRN per student. After Q1 results, the shares crashed from \$160 to ~\$60 because they announced problems with the integration of a new software system, which had slowed enrollment. At Q2, they announced those problems were under control, but 2026 will be a no growth year. At no growth, this capital light business is arguably too cheap at 7x EBIT or 9.5x FCF. If it returns to 10-15% growth next year, why wouldn't it trade at its historic 15x EBIT? Update 4/28: Q3 earnings inline. Partner pipeline strong. Student demand strong. Update: Canvas hack on 5/8 causes minor sp correction.
JB1	Janus International Group Inc	2/22/2026	Janus International Group, Inc. manufactures and supplies turn-key self-storage building solutions. The Company offers self-storage and commercial industrial doors, relocatable storage units, facility automation solutions, and door replacement and self-storage restoration services. Janus International Group serves customers worldwide.	-53%	700	429	1,352	JB1 is a near monopoly (80% market share among the public storage REITs) on doors for self-storage. Doors are 5% of the total cost of self-storage, but they are mission critical. A well-functioning door means you can operate the facility with no employees. This is indirectly a play on a recovery in existing home sales (a favorite KEDM theme). There is a commercial business (think: doors for truck warehouses) which recently disappointed (blamed on project timing), leading to the selloff. Management has a murky history of setting guidance. Beware, JB1 has not yet shown it has 'bottomed', but this is ~10x FCF (at hopefully trough margins) and if commercial's setback was indeed just a timing issue, this should quickly rerate. Update 5/12: Q1 '26 started with weak margins. Guide reiterated. No market recovery in sight. Update 7/31: Removing from monitor. Margin pressure and cycle turns negative.

PR Date	Parent Company	Parent Ticker	Parent Market Cap (\$M)	Sector	Expected Timing	PR to Date (%)	PR	Ppt.	Notes
7/28/2026	HF Sinclair Corp.	DINO	16,490	Oil & Gas Refining & Marketing	Q4 2027	2%	Link		HF Sinclair plans to separate its Lubricants & Specialties segment into an independent publicly traded company. The business will adopt a more capital-light model, while the Mississauga base-oil refinery will be retired during 2027.
7/30/2026	Vedanta Ltd.	VEDL IN	10,817	Industrial Materials	TBD	-1%	Link		Vedanta approved another demerger, this time transferring its surplus real-estate portfolio into Vedanta Property Platforms Ltd., which is intended to list on the NSE and BSE. Shareholders will receive one VPPL share for every 20 Vedanta shares. The portfolio consists of approximately 2,200 acres of industrial land and 55,000 square feet of residential and commercial property.
5/6/2026	Flex Ltd.	FLEX	41,677	Hardware, Equipment & Parts	Early 2027	-16%	Link	=	Flex announced it will spin off its Cloud and Power Infrastructure segment into a new publicly traded company. The asset is tied directly to AI data-center power, cooling, and infrastructure demand. Revathi Advaiti is expected to lead SpinCo; Michael Hartung is expected to become Flex CEO. Update 7/24/26 - CEO's interview published. SpinCo carries ~\$6.6B revenue and management guides it to 65-75% growth this year and 80%+ next. Form 10 pending. Update 7/29/26 - Flex named the leadership teams for both businesses. Revathi Advaiti will be CEO and Bill Watkins non-executive chairman of the Cloud & Power Infrastructure SpinCo; current Flex CFO Kevin Krumm will become SpinCo CFO.
6/29/2026	Comcast Corp.	CMCSA	85,025	Telecommunications Services	Q2 2027	-1%	Link	=	Plans a tax-free separation into a connectivity-focused Comcast and a separately traded media company containing NBCUniversal and Sky. Mike Cavanagh would lead the media company, while Michael Angelakis would lead the remaining Comcast. Comcast may retain up to 19.9% of the media company. Update 7/30/23 - Christopher Halpin as CFO, effective Sep 8.
9/24/2025	KBR, Inc.	KBR	4,642	Engineering & Construction	1/4/2027	-26%	Link	Link	KBR announces plans to spin off its Mission Technology Solutions business, to be completed mid/late 2026. SpinCo MTS will continue to scale as a highly trusted, government services provider for critical national security and space. RemainCo New KBR will continue to build on its sustainable technology solutions business. SpinCo is expected to benefit from its capital light model with diversified long-term contracts with predictable cash flow, robust backlog and strong marketplace position. New KBR is expected to benefit from its low capital intensity, access to diversified revenue streams and robust FCF with high conversion. Update 2/24/26 - Fitch maintained the credit rating 'negative' due to the spin-off. Fitch stated that Spinco is a lower-margin, stable business. Update 4/29/26 - The activist Engine Capital, with ~2% ownership, urged the company to explore a sale. Update 5/5/26 - The Spin-off completion target is by Jan 4, 2027. Update 6/25/26 - KBR named Michael LaRouche as CEO-designate and Nicholas Veasey as CFO-designate for its planned Mission Technology Solutions spin-off. The separation is still targeted for Jan 2027. Update 7/30/26 - KBR named its Mission Technology Solutions SpinCo Trinzic and unveiled its new branding.

CEO retention bets and long-term incentives

Ticker	Filing Date	Company	CEO	Mkt Cap (\$M)	TTM Return Before PR (%)	Return since PR (%)	Current Share Price (\$)	Notes	Link to 8-K
UMAC	7/16/2026	Unusual Machines, Inc.	Dr. Allan Evans	980	67%	23%	20.5	Co-founder Evans will waive all cash compensation from Jan 2027, with 5M premium-priced warrants at \$25 as his only remaining economic upside. The package includes five tranches vesting at \$25/\$40/\$60/\$80/\$100 stock prices based on a 20-day VWAP, with the structure heavily back-weighted and 80% of the payout tied to 2x+ hurdles. The complete salary waiver, which creates an absolute zero floor from 2027 onward, is the standout feature. This is the most extreme CEO-alignment structure, with 5.17x top-tier back-weighting and a zero floor across all five dimensions at the maximum level. Shareholder approval remains pending, and the roughly 26% dilution is the main risk to the structure taking effect.	LINK
AIR	7/16/2026	AAR CORP	John M. Holmes	5,564	86%	4%	139.5	AAR Corp just granted CEO John Holmes a special one-time performance equity award of 161,500 shares, separate from his regular annual LTI, with vesting tied entirely to stock price targets. The backdrop for the grant is genuinely strong: record FY2026 results, 19% revenue growth, a 12.1% adjusted EBITDA margin, and net leverage already down to 2.03x after integrating multiple acquisitions. That context makes the \$175/\$200/\$250 hurdles more credible, betting on continued momentum, not a recovery.	LINK
SNOW	7/16/2026	Snowflake Inc.	Sridhar Ramaswamy	103,321	41%	10%	298.1	The award landed 16 days after shareholders rejected Say-on-Pay, the board backing its CEO over shareholder optics. 1,000,000 PSUs across five price tranches (\$324–\$531) back-weighted into 7-year periods anchoring him through 2033, all from a confirmed \$270.02 grant price. Once both the price hurdle and service condition are met, Ramaswamy still waits another full year before receiving the actual shares. High signal driven by exceptional absolute leverage (\$270M) and the 7-year lock-in. Hurdles (1.20x–1.97x) real but not extreme relative to top tracker entries.	LINK
ACEL	7/11/2026	Accel Entertainment, Inc.	Mark T. Phelan	973	-2%	-4%	12.0	Mark T. Phelan has been building Accel's US Gaming operation from the inside since 2017 and knows exactly where the growth levers are. The board gave every executive a 70/30 stock/TSR default, Phelan alone elected 100% to absolute price goals, voluntarily waiving the safety net his CFO and CLO both kept. That deliberate bet-on-yourself move is standing out. The hurdle structure is uncapped above the top threshold. Meaning there is no ceiling on his payout if the stock does really well.	LINK
DMRC	7/6/2026	Digimarc Corporation	Paul Carreiro	146	-52%	-15%	6.5	Paul Carreiro is a pure enterprise software sales operator, (Elemica sold to BASF \$495M, Kinaxis, Infor, SAP) brought into a company with proven technology that has struggled to convert it into commercial revenue. The board's thesis is explicit: the product works, the distribution doesn't, so hire the closer. 752,600 performance LTIP units across three hard-deadline tranches (\$14.37 by July 2028, \$21.92 by July 2029, \$38.33 by July 2030) from a confirmed \$7.65 grant price, with permanent forfeiture if any window is missed. The award landed against a going concern qualification and a \$17.5M ATM filing the same week. What stands out is the 5.01x top-tier multiple and binary per-tranche deadlines. \$500K base salary, guaranteed 2026 bonus, and quarterly time-vesting units provide the only cushion.	LINK
VELO	6/29/2026	Velo3D, Inc.	Arun Jeldi	289	32%	-47%	9.7	Having built Velo3D's CEO role through a prior April 2026 performance award before this updated grant, Jeldi brings deep operational credibility in defense and aerospace metal additive manufacturing. The board is betting he can scale Velo3D from a ~\$500M company to a \$10B platform, the rationale anchored in IDIQ defense contracts, SpaceX supply relationships, and the new California RPS facility. 964,474 NSO options at \$18.40 across four market cap milestones (\$1B/\$3B/\$5B/\$10B, 10%-40% per tier) back-weighted 40% at the \$10B tier, 5-year period to June 2031, from a confirmed ~\$500-615M baseline. Zero guaranteed value, every option is at-the-money and worthless below \$18.40. Highest signal driven by maximum on every dimension: no floor, 16-20x top-tier multiple, pure single metric, 5-year lock-in. The only thing worth mentioning here is that market cap milestones are less directly observable than stock price hurdles.	LINK
FBIN	6/29/2026	Fortune Brands Innovations, Inc.	Jesse G. Singh	5,875	-2%	-3%	49.3	850,000 PSUs across three price tiers (\$80/\$100/\$125) from a confirmed \$50.97 grant price, binary per tier, 3-year performance period to July 2029 with service vest extending to year four. Singh committed to a mandatory \$1M personal stock purchase in his first trading window, which is the clearest skin-in-the-game signal, with all net shares locked during employment and 50% held for one year post-termination. Confirmed 1.57x–2.45x price hurdles. The only thing preventing a perfect score is the real salary and bonus floor.	LINK
CVI	6/22/2026	CVR Energy, Inc.	Dane J. Neumann	3,828	39%	36%	38.1	\$800K base + \$1.2M target bonus + standard 150% LTI provide a guaranteed floor for Neumann's core role. The special 27,372-unit PSU (~\$820K-\$900K at grant) is 100% contingent on CVR acquiring controlling interest in 2+ petroleum refineries within exactly 12 months. Total forfeiture if missed, no partial credit. Score driven by the mega-scale, single-purpose M&A milestone and its hard 12-month deadline with zero partial credit, only modestly tempered by the guaranteed base and bonus sitting outside this specific award. RYAM	6/22/2026	Rayonier Advanced Materials Inc	Daniel M. Krawczyk	604	132%	9%	9.0	Amid a strategic alternatives review, RYAM needs a CEO willing to stay through a potential sale or restructuring, with compensation structured to penalize early departure. The package includes a \$1.75M LPU grant vesting off a \$9.37 baseline, delivering full value at +50% and capping at 15x (~\$26M) at +100%, mirroring a prior grant to Sutton that never vested due to his early resignation. The 15x upside cap is the key feature, but combined with the ongoing review and a predecessor tenure of just 3.5 months, the primary risk is that the incentive may never ultimately matter.	LINK
BE	6/17/2026	Bloom Energy Corporation	Dr. KR Sridhar	61,003	871%	-27%	207.1	271,271 PSUs at target (up to 813,813 at 300%) tied to peak rolling 4-quarter revenue across five thresholds, 2-year post-vest hold extending to 2031, from a confirmed grant price in mid-June 2026. The standout mechanic is the 2-year mandatory post-vest hold on top of the performance period. Sridhar cannot liquidate any earned shares until 2031 regardless of when the revenue targets are hit, creating a long combined performance-to-liquidity horizon.	LINK
ESAB	6/12/2026	ESAB Corporation	Shyam P. Kambeyanda	5,211	-31%	-6%	85.6	The board's rationale is pure performance alignment at the top of a multi-year value creation cycle. 580,552 options at a confirmed \$82.92 exercise price across three stock price tiers (\$140/\$170/\$200), with 30-day average measurement and a 12-month non-compete clawback that makes resignation economically punishing even after vesting. The standout mechanic is the clawback structure: if Rosenboom leaves voluntarily within 12 months of any option exercise, ESAB can reclaim the entire gain, effectively extending the lock-in well beyond the formal vesting date and making this one of the few awards in the tracker where the board retains economic leverage after the performance condition is met.	LINK
KSCP	6/8/2026	Knightscope, Inc.	William Santana Li	40	-68%	-11%	2.0	With Q2 revenue tripling to \$9M and 434 clients across 42 states, the operational inflection is real but the distance to the milestones is enormous. \$65M in performance cash across four market cap thresholds (\$500M/\$1B/\$2B/\$3B) with dual conditions: 30-day VWAP and 6-month trailing average must both meet each threshold alongside corresponding revenue and EBITDA targets, over a 5-year period from a confirmed ~\$30M current market cap. Zero guaranteed value in this specific award. every dollar requires a 14-100x+ market cap build from here.	LINK
DBVT	6/5/2026	DBV Technologies S.A.	Daniel Tassé	818	62%	-17%	13.8	This June grant supersedes the May award in strategic significance: 4,057,971 PSUs vesting 100% only on full FDA approval of Viaskin Peanut by July 1, 2028, same hard deadline, same total forfeiture if missed. Combined with the May grant the total exposure is 5,797,101 PSUs on two sequential binary milestones: BLA acceptance then FDA approval within the same 28-month window.	LINK
JCI	5/13/2026	Johnson Controls International plc	Joakim Weidemanis	87,154	52%	0%	143.9	At-the-money options (\$10.5M CEO target) contingent on a dual gate. Net sales growth versus FY2025 plus a market cap threshold over a 5-year period, exercisable only during a 2-year window from October 2030 through September 2032, with forfeiture on any other termination including retirement. The 2-year-only exercise window is the standout structural mechanic. Weidemanis cannot exercise early, and a market dip during those 24 months erases the value even if the performance goals were met. No floor and a 7-year combined horizon	LINK
PHUN	5/18/2026	Phunware, Inc.	Dmitry Kroshka	44	-32%	5%	2.1	317,460 performance RSUs vesting only when BOTH a 20-day VWAP at or above \$5 AND trailing 12-month revenue of at least \$4.5M are achieved simultaneously, from a current price of ~\$2.13 and a ~\$2M revenue run rate. The standout mechanic is the AND condition: stock price alone isn't enough, revenue traction has to be real and sustained at the same time, making this one of the cleaner dual-gate structures in the tracker.	LINK
CCOI	5/4/2026	Cogent Communications Holdings, Inc.	David Schaeffer	663	-75%	-19%	13.2	Schaeffer takes \$0 base salary, making this 1,000,000-share performance award his entire compensation. 200k/300k/500k shares vest when the 60-day VWAP hits \$70/\$85/\$100 respectively, against a grant price of ~\$43 (Feb 28, 2026), but with CCOI since falling to ~\$12, the effective multiples are now 5.6x/6.8x/8.1x from current price. The standout mechanic is the 50% back-weighting to the \$100 tranche: Schaeffer only captures the majority of this award if the stock recovers to 8x from here, and the five-year clock is already running.	LINK
LION	4/15/2026	Lionsgate Studios Corp.	Jon Feltheimer	3,980	64%	26%	13.4	\$1.5M salary + \$7.5M bonus + \$10M annual LTI, ~53% guaranteed. Hunterbrook	7/8/2026	BE	Bloom Energy Corp.	Electrical Equipment & Parts	63,618	-608,709	7%	0%	0%	LINK	The fuel-cell maker secretly depends on Chinese scandium even though its CEO has repeatedly denied any China supply chain on earnings calls; Most of the company's recent revenue comes from its financing partner Brookfield, rather than real end customers and its marketed \$20 billion order backlog is over 40 times bigger than the contracts its auditor actually confirmed. Update 7/30/2026 - New data across 15 years and four regions shows Bloom's fuel cells missing the same guarantees /all 37 metered New York units fell below the efficiency line at a median of 20 months instead of five years/ and output missed the 95%; one customer says Bloom paid a multimillion-dollar penalty for falling short.
Pelican Way Research	7/29/2026	ALOY	Bloom Energy Corp.	Electrical Equipment & Parts	63,618	-17,000	12%	0%	0%	LINK	The company's core technology rests on old science that has never worked and on a study it used without permission; the people involved including a sanctioned stock promoter and someone a reporter called a "mob boss." Spruce Point	7/29/2026	CGG CN	Bloom Energy Corp.	Electrical Equipment & Parts	63,618	0	0%	-15%	149%	LINK	Weak governance and heavy reliance on its top shareholder, China National Gold, which bought 99.5% of CGG's sales in 2025; Mismatched payments between the two companies, ties to people previously charged with fraud, and a missed deadline on anti-corruption filings that CGG then wrongly dated; 50-75% downside risk; both of CGG's mines are struggling to hit production and the stock trades too rich versus safer mining peers.
Bleecker Street	7/23/2026	LYFT	Bloom Energy Corp.	Electrical Equipment & Parts	63,618	-85,234	25%	-15%	149%	LINK	The company faces an estimated \$1.3 to \$2.7 billion in sexual assault lawsuit liabilities but has set aside almost nothing to cover them, unlike rival Uber, which discloses similar risks; Lyft never told investors these cases were folded into a big federal lawsuit and expects thousands more claims as the case count keeps growing quickly; the company's core ridesharing business is losing ground to Uber and Waymo, so covering these costs may force Lyft to raise money by selling more stock.
White Diamond Research	7/14/2026	RTB	REAlloys Inc.	Other Precious Metals	612	0	7%	20%	11%	LINK	A company that has rebranded three times, from Greenbox POS to RYVYL to RTB, after its former executives settled SEC fraud charges; Its new "AI/crypto media platform" website gets only about 50 visits a month, and independent checks found roughly 40 partner sites rather than the nearly 200 the company claims; The \$200 million valuation doesn't match the tiny, barely-used business underneath it.

DSX is making the offer in partnership with SBLK, who made an agreement to acquire 16 vessels for \$470.5 mil in cash. The financing is fully committed. Update 3/19/26 - The Board rejected the offer, stating that the price is substantially below the company’s internal value. Update 3/20/26 - DSX issued a letter, urging shareholders to push the management for the merger and launched a proxy contest. Update 3/30/26 - The company claimed that the DSX offer substantially undervalues the company. Update 4/7/26 - DSX launched a shareholder defense website: https://www.gencodrivesuperiorreturns.com/ . Diana press release: ISS recommends voting AGAINST Genco’s poison-pill ratification. Update 6/11/26 - GNK affirmed its commitments to rights agreement. Update 6/17/26 - Diana raised its offer to \$27.34/share (\$24.80 cash + 1 Diana share) - its 4th proposal. Update 6/18/26 - Genco shareholders overwhelmingly re-elected all six Genco directors at June 18 annual meeting. Genco Board maintains REJECT against the offer. Update 7/13/26 - Diana extended its tender offer, now expiring on Jul 24. Genco board reiterates its rejection. Update 7/23/26 - Board said its advisors have engaged with Diana’s advisors on price, terms and structure; flagged that Diana’s stock has fallen to \$2.20 (vs. the \$2.54 value Diana ascribed to it), raising dilution/valuation concerns. Update 7/24/26 - Diana’s tender offer expired (31.6% of untendered shares tendered); Diana confirmed it will NOT extend or reinstate the offer, though its \$27.34/share proposal remains on the table. Update 7/27/26 - Genco said it’s pursuing its own ‘Comprehensive Value Strategy’; Diana urged renewed negotiations. Update 7/28/26 - Diana flagged Genco fleet values down ~\$51mil (3.4%) since the June 3 peak, pressing the board to re-engage before further erosion. Update 7/29/26 - Genco responded to the expiration of Diana’s tender offer, saying it will continue good-faith talks and keep reviewing Diana’s non-binding \$27.34 proposal; Q2 results due Aug 5. Quarterly Investor Letters

Fund (CIO)	Letter Link	Net Return	Top Holdings Discussed	Highest Conviction Name	Summary
AGT Partners (Gregory See)	LINK	32.4% (YTD)	GOOG, 000660 KS, Marco Polo Marine, Nam Cheong, OKP Holdings	Singapore small-cap activist stakes — AGT's strongest conviction sits in under-followed names where it has become a substantial (over 5%) shareholder, including OKP, Marco Polo Marine, Nam Cheong and ISOteam, and appointed former Dyna-Mac CEO AC Lim to help unlock value.	We recently purchased Alphabet, viewing its heavy AI-infrastructure investment as extending rather than disrupting its moat across Search, Cloud, YouTube and Gemini, and we continue to own and add to businesses such as DBS, TSMC, Tencent, CNOOC and Microsoft. We have surfaced as a substantial shareholder in several under-followed Singapore companies including OKP, Marco Polo Marine, Nam Cheong and ISOteam, added to our palm oil holdings after an Indonesian export-policy scare prompted insider buying, and appointed former Dyna-Mac CEO AC Lim as an adviser to help unlock value. We remain wary of speculative excess in Korean semiconductors, where new leveraged single-stock ETFs have driven SK Hynix and Samsung to unsustainable swings, and we regard the memory industry's aggressive price increases as cyclically unsustainable.
Bengal Capital (Jason Emeott & Josh Rosen)	LINK	-	GRIN CN, Body and Mind, LadderRe	GRIN CN — Grown Rogue, the largest and highest-conviction position, embodies the cultivation-math thesis through record A-flower yields, industry-leading cost per pound and a rapidly scaling New Jersey operation.	We think most of the cannabis sector misprices what drives durable value: companies that position to the capital markets around future regulatory catalysts get rewarded, while the real engine, efficient unit-economic cultivation of A-grade flower, is overlooked. Our largest and highest-conviction position, Grown Rogue, reflects this through record A-flower yields, industry-leading cost per pound and a rapidly scaling New Jersey operation, with our partner Josh Rosen serving as its Chief Strategy Officer. We place no value in the Tier 1, 2 and 3 market-cap designations the sector treats as signals of quality, believing sustainable profits and execution rather than size or rescheduling hype will drive returns.
Cedar Creek Partners (Tim Eriksen)	LINK	12.6% (YTD)	EXCE, HRBR, PHIG, SODI, ENDI	EXCE — largest position at ~10% of the fund, an onshore natural-gas producer (49% Fairfax-owned) trading under 4x earnings the manager values near \$55 on a listing and ~\$80 in a sale	We continue to find our best opportunities in overlooked microcap and over-the-counter names, including a growing sleeve of expert-market stocks that most investors are restricted from buying, where we believe the buying restriction itself creates lasting value. We added to positions such as Exco Resources and Harbor Diversified and built a basket of attractively priced community banks, and our control position Solitron Devices is pursuing strategic alternatives after retaining an investment banker. We are holding modestly elevated cash and continue to find more attractive ideas than capital.
GreensKeeper Value Fund (Michael Van Loon)	LINK	1.9% (YTD)	ICLR, ICE, CFR SW, ELV, GOOG	ICLR — ICON, wrongly treated as an AI loser after a revenue restatement, is the highest-conviction idea; the position was materially increased at peak pessimism on the view that roughly \$1bn of free cash flow and its customer relationships stay intact.	We viewed the market's rush to dump ICON after its revenue-restatement and whistleblower-lawsuit disclosures as an overreaction; while investors sold amid the uncertainty, we spent 24 hours reviewing the filings, concluded that its roughly billion-dollar free-cash-flow generation and customer relationships were intact, and materially increased our position at peak pessimism. The delayed results validated us, with the restatement proving immaterial to revenue and cash generation while bookings outpaced other clinical-research peers. We take a similar stance on Intercontinental Exchange, where we see consensus fears about perpetual futures disrupting its energy franchise as overblown.
L1 Capital Long Short Fund (Raphael Lamm & Mark Landau)	LINK	12.5% (YTD)	QAN AU, JHX AU, BSL AU, HBM, GMG AU	Copper and gold equities — the highest-conviction tilt is to constrained-supply commodities (Hudbay Minerals, NexGen) and construction materials, added to through the March-April volatility while the fund holds limited exposure to the narrow AI rally.	We used the March to April sell-off to add to copper, construction materials, travel and gold equities where share prices had fallen despite improving fundamentals, funding this partly by trimming infrastructure holdings and materially reducing oil and gas after a sharp rally. Our largest contributors this quarter were Qantas, James Hardie, BlueScope, Hudbay Minerals and Goodman Group, and our focus remains on gold, copper, construction materials, infrastructure and select financials. We view the broader equity rally as extremely narrow and deliberately hold limited direct exposure to the AI-infrastructure names driving it.
LVS Advisory (Luis V. Sanchez and team)	LINK	4.6% (YTD)	VISN, 9435 JP	VISN — a former CommScope left for dead, now breaking itself up and returning cash through special dividends, bought at \$13.52 for an estimated \$24-28 of value with a high likelihood the remaining business is sold soon	Our event-driven book centers on Vistance Networks, the former CommScope, which is breaking itself up and returning cash to shareholders through special dividends, with a strong likelihood the remaining business is sold before long. On the growth side we initiated our first-ever position in Japan - Hikari Tsushin, a founder-led, highly disciplined conglomerate trading at a deep discount to the sum of its parts - after traveling to meet its executives. We remain focused on catalyst-rich situations where value is likely to be unlocked in the near term.
Mayar Capital (Abdulaziz A. Alnaim and team)	LINK	-6.3% (YTD)	KVUE, ULVR LN, BNZL LN, LONN SW, CRDA LN	LONN SW — a new position the manager calls one of the highest-quality businesses studied in years, bought after intensive due diligence	We are deliberately underweighting the handful of very large, very expensive US technology names that now dominate the index, going against a consensus that has crowded into a dozen stocks and abandoned a thousand good ones. We read the signals of excess - companies issuing equity rather than cheap debt, a wave of mega-IPOs, AI-pivot shell companies re-rating hundreds of percent, and passive flows distorting prices - as evidence of a bubble, and we expect mean reversion from technology to the rest of the market and from the US to the rest of the world. We will not abandon a process that has worked for two decades to chase names simply because they are going up.
Minotaur Global Opportunities Fund (Armina Rosenberg & Thomas Rice)	LINK	-	000660 KS, MU, NVDA, HUT	000660 KS — the fund's self-described highest-conviction memory position, held at full size at roughly 3x 2027 earnings on the view that the AI-memory upcycle outlasts the market's short-peak assumption	We see the sharp selloff in AI-memory names as an opportunity rather than a verdict, disagreeing with a market that has punished companies like SK hynix and Micron on record results because it assumes a short, sharp peak. In our view the decline has been driven by positioning and deleveraging rather than any change in the facts - demand is still outrunning supply, new capacity will not arrive before 2027, and customers have locked in multi-year take-or-pay contracts - so we have been adding back exposure while others sell.
Palm Harbour Capital (Peter Smith and team)	LINK	-	WOSG LN, ALHG FP, VAR NO, PRT IM, CALT IM	ALHG FP — Louis Hachette / Lagardère is the most detailed thesis, a value and structure play with 60-70% base-case upside as the ownership chain is simplified, and more if Travel Retail is divested or Lagardère is taken fully private.	During the quarter we added a Mexican cement company and two smaller Asian businesses while exiting BW Energy after a strong run and selling M Dias Branco, where a weakening Brazilian consumer and volume declines in cookies and pasta made the turnaround a longer project than we expected. Our most detailed thesis is Louis Hachette and Lagardère, where we see substantial upside as the ownership structure is simplified, with more if the Travel Retail business is divested or Lagardère is taken fully private. Top contributors included Watches of Switzerland on resilient US Rolex demand, Espritnet, Caltagirone and Vitzrocell, while our Asian value names in Korea, Japan, Indonesia and the Philippines lagged as capital rotated into a narrow group of technology stocks.

Quarterly Investor Letters

Fund (CIO)	Letter Link	Net Return	Top Holdings Discussed	Highest Conviction Name	Summary
RLH Capital (Louis Camhi)	LINK	7.5% (YTD)	CCXI, BRUN, BCAR	BCAR — the quarter's showcase trade, bought near trust (~\$10.11) on a downside-protected SPAC whose Exascale Labs merger pushed shares above trust, illustrating the fund's three-ways-to-win framework	We continue to find compelling opportunities across the SPAC market, where heavy new issuance has kept yields wide while renewed enthusiasm for select announced deals has restored meaningful upside optionality. We focus on SPACs trading near or below the cash held in their trust, which gives us downside protection with the chance for accelerated returns if a deal closes or trades above trust. We are also selectively re-entering non-redemption agreements as that part of the market reopens.
Warden Capital (Hawkins Entreklin)	LINK	15.9% (YTD)	GTLB, QURE	GTLB — the largest position, bought into the software selloff on the thesis that as AI accelerates code production, the control, review and approval of that code (where Git sits) becomes more critical, not less, with cheap M&A-target optionality	Our largest position is GitLab, which we bought into a brutal software selloff driven by a consensus fear that large language models will make code-writing tools obsolete. We think the opposite is true: as AI dramatically increases the velocity of code production, the control, review and approval of that code - where Git sits at the center - becomes more critical than ever, and the company is also a cheap, high-value acquisition target for an AI lab. More broadly we believe the AI build-out is overheated and unlikely to earn an adequate return absent near-term AGI, so we hold no semiconductors and carry a sizable short book against the momentum trade.
Zeno (Cristiano Souza)	LINK	-	DHR	DHR — Danaher, the fund's largest position, is the clearest expression of the thesis: durable market power across bioprocessing, diagnostics and life-sciences "picks and shovels" that the current valuation underprices.	Our largest position is Danaher, and we believe the market is wrong to have lost conviction in it after a stretch of disappointing shareholder returns. We see its bioprocessing, diagnostics and life-sciences franchises, the picks and shovels of healthcare with deep regulatory switching costs and very high cash conversion, as retaining durable market power that the current valuation does not reflect. We regard the recent shocks, from COVID destocking and the biotech funding winter to China procurement, NIH cuts and the market's rotation into AI, as having delayed rather than derailed the compounding.
1 Main Capital (Yaron Naymark)	LINK	9.7% (YTD)	BFIT NA, HGV, IWG LN, KKR, MCFE	HGV — Hilton Grand Vacations, a top position trading at a low free-cash-flow multiple due to misperceived cyclicality, aggressively buying back stock with potential to generate close to its entire market cap in free cash flow over five years.	We believe the market misjudges Hilton Grand Vacations, whose shares trade at a low free-cash-flow multiple largely because of the timeshare industry's poor reputation and investors' inaccurate perception of its cyclicality. We think much of HGV's cash flow is actually capital-light and recurring, and as the company aggressively repurchases stock and the market grows comfortable with the durability of that cash flow, we expect the discount to close.
Arquitos Capital Management (Steven Kiel)	LINK	52.9% (YTD)	LQDA, ABVX, FNCHQ	LQDA — Liquidia, the largest position, where a favorable '327 patent ruling (likely invalidation) and a very strong Yutrepia launch drive substantial upside.	When Abivax released strong Phase 3 maintenance results for its ulcerative-colitis drug, the market seized on fears that the data revealed a cancer risk and the shares crashed; we concluded that cancer-risk theme was an illusion. After speaking with most of the players involved, we judged that management had been caught off guard, that the FDA would not read the data as showing cancer risk, and that forthcoming safety data would put the concern to rest. We opened a position into the panic and used the unusually rich options premiums to generate cash, expecting the story to resolve toward a buyout at a much higher price.
Asia Frontier Capital (Thomas Hugger)	LINK	4.1% (YTD)	-	Pakistan (KSE-100) — the fund's largest country weight at 14%, where AFC expects the index to make new all-time highs on IMF-led reforms and macroeconomic and political stability.	Across our frontier-markets universe we have grown more constructive on Pakistan, our largest country weight, where IMF-led reforms, successful USD and CNY bond placements and political stability underpin our expectation for further gains. We also came away positive on Sri Lanka after meeting its central bank governor and portfolio companies, and we view Oman as a relative beneficiary of the Middle East conflict given its location outside the Strait of Hormuz. Our main concern remains the Middle East situation, which kept much of our universe in wait-and-watch mode during the month, and we added to our Mongolia positions.
Blue Tower Asset Management (Andrew Oskoui)	LINK	20.8% (YTD)	ENVA, PBR, SM	ENVA — Enova International, the largest contributor, where the pending Grasshopper Bank merger is expected to be transformative by opening new markets and lowering funding costs.	We think the market has become too complacent about the 2026 Iran War: oil reversed most of its initial spike only because temporary buffers — pre-war inventory builds and China drawing down its record strategic reserves — absorbed the shock, and those buffers are nearing exhaustion. With the ceasefire abandoned and full-scale fighting resumed, we believe the shortages that failed to materialize in the first phase may still come to pass. We added energy producers such as Petrobras and SM Energy, which we view as historically cheap against an unusually expensive broader market and as a counter-weight should oil spike to extreme levels.
Caro-Kann Capital (Artem Fokin)	LINK	-6.0% (YTD)	HAYPP SS, IWG LN, RELY, SOFW IT, AUUA CN	HAYPP SS — Haypp Group, the top position, the dominant online nicotine-pouch retailer with a widening moat and an increasingly favorable FDA backdrop.	We established Remitly Global as a new top-five position, drawn to its digitally native remittance model and a competitive advantage we see building from scale plus counter-positioning against legacy players. Across the book we continue to find opportunity in underfollowed 'orphan' names — Haypp in online nicotine pouches, where the FDA is turning more favorable, Sofwave in non-invasive skin tightening, and Aluula in adhesive-free composites. We are watching several risks closely, including a possible Amazon entry into nicotine pouches, IWG's CEO transition to a relative outsider, and Aluula's need to scale manufacturing and convert its pipeline into repeatable orders.
Castlebay Investments (David MacNeil)	LINK	-	SPX LN, AJB LN, CPG LN, REL LN, CRW LN	SPX LN — our new Spirax Group holding, a mission-critical steam/thermal and biopharma fluid-path leader we believe is a structural grower mispriced by the market as a cyclical industrial.	We recently bought Spirax Group because we believe the market misprices it, valuing the group mainly through the lens of its more cyclical industrial steam business while overlooking its durable, mission-critical service and consumables revenue and the structural growth engine inside its Watson-Marlow biopharma pumps arm. Where the market sees a cyclical industrial, we see a genuine multi-year growth franchise offered at a valuation that does not yet credit that structural growth.
Colebrooke Partners (Jack Pailing)	LINK	-	HWDN LN, MIDW LN, MOON LN	HWDN LN — Howden Joinery, described as having one of the very best moats of any UK listed business, bought at a rare attractive price with decades of high-return depot roll-out ahead.	The market marked down UK housing-linked shares — Howden Joinery among them — because the Iran conflict lifted oil and inflation expectations and led investors to conclude UK rate cuts would be pushed out again; we took the other side of that trade with enthusiasm. We believe rate expectations wash in and out of prices over months, while Howden's franchise, which we regard as having one of the best moats of any UK listed business, compounds over decades, so a short-term rate worry handed us a rare entry into a company long at the top of our wish list. We funded it partly by selling Macfarlane, upgrading to what we see as an exceptional business on similar terms.

Quarterly Investor Letters

Fund (CIO)	Letter Link	Net Return	Top Holdings Discussed	Highest Conviction Name	Summary
Deep Sail Capital Partners (Sean Westropp)	LINK	16.5% (YTD)	CRDO, CLS, AMPG, SPCB, 000660 KS	CLS — Presented as the cheapest way to invest in the AI data-center buildout after reviewing the entire space, with structural margin expansion and secured 1.6T and co-packaged-optics design wins.	We believe the AI data-center buildout still has at least three years to run, and our largest conviction is Celestica, which we consider the cheapest way to own the coming shift to 1.6T networking and co-packaged optics after canvassing the entire space. We were very active this quarter, closing eight positions including Micron, Vertiv and Ouster and opening five new ones such as Celestica, SK Hynix, SuperCom and Intuitive Machines. Looking ahead, we worry that expiring lockups on the coming mega AI IPOs could force broad selling that pressures the market in early 2027, and we are waiting for the right moment to short richly valued memory names.
DKAM Donville Kent Asset Management (Jason Donville and Jesse Gamble)	LINK	-	ZDC CN, BAM I CN, VHI CN, MDA CN, E CN	ZDC CN — Zedcor is the most extensively covered holding, growing revenue ~60% and earnings ~100% with US expansion pushing margins higher, which we believe the market misprices due to accelerated depreciation of its long-lived assets.	We are positioned against the crowd chasing the AI and large-cap momentum trade, which we believe is pulling capital away from profitable small-cap companies and leaving them deeply discounted. We own businesses with no overlap to the major indices that are growing revenue and earnings far faster than the market yet trade at a fraction of its valuation. We are convinced stock prices ultimately follow earnings, so this overlooked value will be realized over time, as it recently was when SSC Security was acquired at a large premium.
Douglass Winthrop (Douglass Winthrop Advisors)	LINK	-	GOOGL, MSFT, AMZN, SPGI	SPGI — we see S&P Global's deeply embedded, standards-based moat as a standout opportunity that has grown cheaper even as the broader market has grown more expensive.	We believe the market has narrowed into a near-singular, euphoric bet on artificial intelligence, and history shows transformative technologies often disappoint the investors who overpay to own them at the outset. Rather than owning the speculative frontier directly, we gain AI exposure through proven, cash-generative businesses, and we see a standout opportunity in S&P Global, the independent standard-setter whose deeply embedded moat the market has overlooked while chasing the AI trade. We think the most crowded parts of that trade have quietly become riskier even as durable businesses like S&P Global have been left more attractively valued.
Equity Management Associates (Larry and David)	LINK	-22.0% (YTD)	ARIS, ASM	ARIS — Aris Mining, the marquee case study, a low-cost gold producer trading at a low EBITDA multiple with sharp production growth and large asymmetric upside.	We hold that the 'monetary debasement' trade is not dead but simply resting, even as the consensus declares it over and crowds into AI names while shunning hard assets. We disagree that the new Fed Chair will stay hawkish or that anyone can fix an unpayable US debt load; in our view the government will ultimately be forced to inflate, and gold is quietly replacing US Treasuries as the world's reserve asset while the West stays asleep to the shift. Against that backdrop we think gold and silver miners such as Aris and Avino are dramatically underpriced and hold asymmetric upside.
Far View Capital Management (Brad Hathaway)	LINK	0.9% (YTD)	WEW GR, UNFI, SNWV, UPSALE SS, LFCR	UPSALE SS — A new Swedish CRM software holding (Upsales) bought after the AIRA demerger revealed the core business's hidden 35%+ EBITDA margins, built into a mid-sized position after deep diligence including a headquarters visit.	During the quarter we established a new mid-sized position in Upsales Technology, a Swedish CRM software company whose planned demerger of its AIRA unit exposed a core business inflecting toward 35%+ EBITDA margins that few investors had modeled. We added to Sanuwave in late June despite a guidance cut driven by CMS audits, a gray market for used Ultramist devices and forced selling from its removal from the Russell 2000, as we remain confident in its wound-care system over the medium term. We ended the period fully invested with short currency-futures hedges and see a momentum-driven market leaving many of our overlooked, off-the-radar holdings mispriced.
Giverny Capital Asset Management (David Poppe)	LINK	5.9% (YTD)	GOOGL, ANET, SCHW, TSM, KNSL	GOOGL — Alphabet, GCAM's largest position, described as a near-monopoly in search with a robust cloud business, a leading AI chip, YouTube and Waymo forming a tremendous collection of assets.	We have deliberately stayed out of sync with the index, continuing to own companies such as Charles Schwab, Mastercard, JP Morgan and Progressive whose earnings keep growing even as their share prices lag. We believe the market has become skewed toward chasing momentum and is mispricing these durable, well-positioned franchises, so we are not inclined to change course and in fact added to several of them during the quarter.
HalvioCapital (Anthony)	LINK	-	HUM AU, XAU CN, Mestek, FP Newspapers, Beng Kuang Marine	XAU CN — Goldmoney is given a full standalone writeup arguing the market ascribes essentially no value to its cash-generative precious-metals storage and trading business on top of a UK real estate portfolio worth more than the whole enterprise value.	We initiated a position in Humm Group, an Australian nonbank lender embroiled in a takeover fight and serious governance disputes, where we still see a path to extracting value despite the stock moving sharply against us. We also opened new positions in Goldmoney, Beasley Broadcast and Sato Foods, exited Tetragon and Pacific Health Care Organization, and trimmed F.I.L.A. We are wary of the froth in anything AI-related, where companies are renaming themselves and repricing violently on sentiment alone.
ITUS Capital (Naveen Chandramohan)	LINK	0.6% (YTD)	HCP IN, NFIL IN, ADSEZ IN, ICICIBC IN, HDFCB IN	HCP IN — Hindustan Copper is the fund's single largest holding at 5.8% and anchors its top sector overweight, Mining & Minerals.	We hold a portfolio of Indian companies across large, mid and small caps. Our largest positions sit in Hindustan Copper, Navin Fluorine, Adani Ports and the leading private-sector banks, and our biggest sector tilt is a sizeable overweight to Mining & Minerals, against underweights in IT, autos and banks.
Laughing Water Capital (Matthew Sweeney)	LINK	33.6% (YTD)	ANAB, LQDA, NN, LFCR, LRN	ANAB — A post-spin royalty company on blockbuster cancer drug Jemperli, bought below intrinsic value with near-immediate 'lotto ticket' upside from litigation against GSK expected to resolve via settlement or buyout.	Three of our top five positions were acquired during the quarter, Theravance, Avanos and SECURE Waste Infrastructure, leaving us holding meaningful cash and merger securities and a more concentrated book than usual. Our new top position is AnaptysBio, a post-spin royalty company on the cancer drug Jemperli, where we see near-term upside from its litigation against GSK that we expect to end in a settlement or an outright buyout within weeks. With global macro and political tensions elevated, we are comfortable concentrating in situations that have distinct near-term catalysts and little connection to the broader economy, including Liquidia's awaited court ruling and Nextnav's FCC rulemaking.
Longrivers Investment Partners (Graham F. Rhodes)	LINK	0.0% (YTD)	TSM, META, NVDA, KLAC, AMZN	TSM — Taiwan Semiconductor, held since 2023 and framed as the irreplaceable manufacturing choke point for leading-edge chips whose yields, scale and execution few rivals can reproduce.	We remain invested in a focused group of AI-exposed businesses—Amazon, KLA, Meta, Nvidia and TSMC—that we believe can retain value and reinvest earnings across a range of scenarios. Our main worry is that the enormous AI infrastructure build-out may not earn an adequate return as the capital cycle advances, so we have begun reducing our aggregate weight in these names and raising cash to keep flexibility as the evidence becomes clearer.

Quarterly Investor Letters

Fund (CIO)	Letter Link	Net Return	Top Holdings Discussed	Highest Conviction Name	Summary
Merion Road Capital (Aaron Sallen)	LINK	20.1% (YTD)	HONA, UBAB, BELFB, BUKS, FEIM	HONA — Honeywell's newly separated aerospace business (Honeywell Aerospace), which the manager is actively buying as conservative guidance and downbeat analyst initiations set a low bar at a below-peer valuation.	We are buying Honeywell's newly separated aerospace business even as sell-side analysts publish uninspiring initiation reports focused on its slower growth. We think management's conservative guidance sets a deliberately low bar the company should be able to clear, and with the stock settling below its peer set and attractive on an absolute basis, we believe the prevailing pessimism is misplaced.
Minot Light Capital Partners (Tom Wetherald and Eddie Reilly)	LINK	17.1% (YTD)	SNDA, XTRAF, RMTI, MXCT, SWAG	RMTI — Rockwell Medical, recently made a large position after a reverse-split selloff, trading near net cash with a US duopoly in dialysis bicarbonate concentrates and a highly asymmetric risk/reward.	We are deliberately positioned against the market's momentum trade, steering clear of the speculative AI, semiconductor and quantum names leading the small-cap rally even though doing so has meant accepting relative pain. We believe that when this momentum moderates or reverses, our portfolio of profitable, strong-balance-sheet small and micro-cap companies is well positioned, and we are already seeing early signs that this thesis is starting to play out.
Moon Capital Management (David Moon)	LINK	4.0% (YTD)	ZTS, DVA, GOOGL, GDDY, SSNC	ZTS — Newly purchased world-leading pure-play animal health company (Zoetis) bought at under 11x earnings on temporary companion-animal concerns that Moon believes badly understate the franchise's durability and long-term earnings power.	During the quarter we exited DaVita after a multi-year holding, concluding that a normalized valuation and a flat dialysis-volume outlook left far less future opportunity, and we redeployed the capital into Zoetis, the world's largest pure-play animal health company, purchased on what we view as overblown fears about companion-animal growth. We remain reluctant to fully embrace the AI theme, worried that the enormous capital being committed to AI infrastructure may not earn returns above its cost of capital and has turned several high-quality businesses into capital-intensive, low-free-cash-flow ones. That caution leaves us meaningfully underweight technology relative to the index.
Open Insights Capital (Nelson Wu)	LINK	-	OXY, VAL, RIG	OXY — our most-discussed position; we view the shares as significantly undervalued near \$50, with sustained mid-\$80s oil implying cash flows worth roughly \$80/share, and see it as a compelling takeover candidate.	We believe the market has wrongly extrapolated the temporary June relief in the Strait of Hormuz into a lasting normalization and has positioned itself heavily short crude even as the disruption persists and inventories fall to new lows. We think that consensus is mistaken: product prices are already screaming higher and crude must inevitably catch up as the physical market tightens. This is why we remain long our energy holdings, including Occidental and Valaris/Transocean.
Pangolin Asia Fund (James Hay)	LINK	-4.6% (YTD)	ALLZ MK, BBCA IJ, AMRT IJ	ALLZ MK — Allianz Malaysia is one of the fund's largest positions, a highly profitable insurer on ~7.6x forward PE trading at RM21 versus our conservative RM40 valuation.	We are buying into the weakness across our ASEAN markets, particularly Indonesia, where headline fears and a threatened MSCI downgrade have pushed prices to what we regard as giveaway levels. We think consensus is far too gloomy: Asian consumption is growing faster than most of the world and simply isn't priced in, while the off-index, out-of-favour companies we own are being ignored by passive and index-hugging money. That is why we continue to add to these overlooked positions.
Penn Davis McFarland (Jeff Helfrich)	LINK	-	ACN	ACN — Accenture, bought this quarter at multi-year lows, framed as the company best positioned to help enterprises implement AI while the market wrongly fears AI will make consultants obsolete.	We bought Accenture this quarter, taking the other side of the market's fear that AI will automate away the need for consultants — a fear that has pushed the shares to multi-year lows. We believe the opposite is true: just as Accenture profited from helping clients adopt cloud software rather than being displaced by it, it is the company best positioned to help enterprises embed AI across their operations, so the very anxiety compressing its valuation is what creates the opportunity.
Plural Investing (Chris Waller)	LINK	4.3% (YTD)	STRT, WOSG LN	WOSG LN — Watches of Switzerland, the biggest contributor and a significant holding, with Rolex-subsidary-like economics and a long runway to redeploy capital at roughly 20% returns.	Our contrarian view is that investors keep misreading Watches of Switzerland as an ordinary luxury retailer, when its economics are really those of a Rolex subsidiary — lengthy customer waiting lists that produce near-guaranteed sales, real pricing power, and no inventory risk. The market fretted over Swiss-watch tariffs, a rising gold price, a weaker dollar, and Rolex's purchase of Bucherer, yet the company's earnings proved resilient and those Bucherer fears proved unfounded. We think US waiting lists are broadly lengthening, this resilience remains underappreciated, and WOSG will keep consolidating the US market as Rolex's preferred roll-up vehicle.
Praetorian Capital Management (Harris Kupperman)	LINK	11.3% (YTD)	LINC, UTI, JOE, MRX	Emerging Markets basket — the fund's largest position, a bet that a weakening US Dollar driven by Trump-administration policy will finally act as the catalyst to unlock deeply cheap emerging-market valuations.	We stand firmly against the market's AI enthusiasm, believing most of the capital pouring into AI infrastructure will ultimately be impaired, just as the canals, railroads and fiber buildouts bankrupted the investors who funded them while enriching the second-order beneficiaries. Rather than own the AI capex suppliers, we are positioning to be 'Rockefeller', buying ancillary winners such as the two largest US technical colleges that should benefit as AI-driven headcount cuts force millions of workers to reskill. We expect that as capex growth inflects lower, those chasing today's AI bottlenecks will be painfully surprised when new supply arrives just as demand slows.
Summers Value Fund (Andrew Summers and team)	LINK	37.8% (YTD)	LQDA, ELMD, ANAB, CCSI, HALO	LQDA — Liquidia is the Fund's largest position and top contributor, with Yutrepia's launch outpacing expectations and an expected favorable litigation ruling that could unlock further gains.	We continue to find opportunity in under-followed healthcare and pharmaceutical names, with meaningful exposure to royalty businesses we favor for their high margins and cash generation. During the quarter we initiated AnaptysBio ahead of an expected litigation resolution, exited Avanos after its acquisition, and sold Embecta following the loss of a major customer and a dividend cut that we admit we underestimated. Consensus Cloud Solutions remains a notable holding as management pays down debt, buys back stock, and returns the business to growth.
Tapasya Investment Fund (Pratik Kodial)	LINK	-10.2% (YTD)	GOOG, AMZN, IBKR, ADYEN NA, UBER	GOOG — Alphabet is the fund's largest holding and top contributor, where the market's panic over AI disrupting search has proven premature while Cloud and Waymo show exceptional economics.	Our largest position is Alphabet, where we disagree with the market's panic that AI will disrupt its core search monopoly; we see that fear as premature while Cloud and Waymo compound with exceptional economics. We took a similar contrarian stance in initiating Adobe amid an over-correction driven by fears that generative AI would destroy its moat, when we expect AI to make its creative suite more entrenched rather than less. These positions reflect our conviction that consensus AI-disruption fears are overblown for dominant franchises.
