From: Mohnish Pabrai, Managing Partner
Date: January 15, 2016
Re: **2015 Results et. al.**

Dear Partners:

Happy New Year! December 31 was our annual redemption date. A total of \$57.8 million was redeemed from the various funds in 2015. The redemptions on a per fund basis are:

PIF2: \$7.0 million PIF3: \$25.4 million PIF4: \$25.4 million

Included in the above redemptions are \$1 million from PIF2 and \$2 million from PIF4 by Dalal Street, LLC. These redemptions were made to cover taxes, office expenses and to fund my family's contributions to The Dakshana Foundation.

As a reminder, PIF2 and PIF4 are closed to new investors (or additions from existing investors), and only PIF3 is open to new money from existing or new investors. PIF3 is our offshore fund for Accredited Investors and Institutions based outside the United States. To invest in PIF3, one needs to be a non-US accredited offshore investor, private foundation, endowment, or IRA.

The minimum investment to join as a new partner is \$2.5 million for individuals and \$10 million for IRAs/Foundations/Endowments. For current investors, the minimum addition to their current investment is \$25,000. The next opening is on February 1, 2016. If you are interested or would like more information, please contact Julie Teltscher or me at jteltscher@pabraifunds.com and mp@pabraifunds.com, respectively.

For the quarter ended December 31, 2015, \$450k was added to PIF3 by existing and new partners.

Please note that various indices in this letter are included for reference. Reference to an index or benchmark does not imply that the strategy will achieve returns, experience volatility, or have other results similar to the index. As an example, the Funds may invest in foreign securities or fixed income instruments; however the indices presented only include U.S. securities. These indices are purely a basket of stocks, and the Funds may invest in securities other than stocks such as bonds, warrants and preferred stocks. The Funds typically hold fewer than 10 positions as compared to 500 in the S&P, 30 in the DJIA, and thousands in the NASDAQ. Therefore, the Funds are significantly more concentrated than the benchmark indices and may experience notably higher volatility and return characteristics from these indices.

The updated performance numbers on all the funds are:

PABRAI INVESTMENT FUND 2 (US Accredited Investors) Performance Summary:

	DJIA	NASDAQ	S&P 500	PIF2 (net to investors)
10/1/00-6/30/01	-0.2%	-41.0%	-14.0%	+17.4%
7/1/01-6/30/02	-10.3%	-32.7%	-18.0%	+35.3%

Cumulative	+136.8%	+58.4%	+91.6%	+535.2%

Comparison of changes in value of \$100,000 invested in PIF2 vs. the Indices.

PIF2: \$635,200 Best Index (Dow): \$236,800

PIF2 Investors:

A \$100,000 investment in PIFI at inception on July 1, 1999 and rolled over into PIF2 on 12/31/02 (\$197,900) was worth \$889,900 as of December 31, 2015 (net to investors). This equates to an annualized return of 14.2% since inception – after all management fees and expenses. The best index over the same period was the Dow and an investment of \$100,000 in the DJIA on July 1, 1999 was worth \$234,400 on December 31, 2015 – an annualized gain of 5.3%. The Dow gains include reinvested dividends. In the graph above, the start date for PIF2 is shown as June 2000 for readability. The correct start date is October 2000.

PABRAI INVESTMENT FUND 3 (Offshore/IRA Investors) Performance Summary:

	DJIA	NASDAQ	S&P 500	PIF3 (net to investors)

Annualized	+8.0%	+10.0%	+8.2%	+7.3%
Cumulative	+156.1%	+221.8%	+163.9%	+137.1%

PIF4 Investors:

A \$100,000 investment in PIF4 at inception on October 1, 2003 was worth \$237,100 as of December 31, 2015 (net to investors). This equates to an annualized return of 7.3% since inception. The best index over the same period was the Nasdaq and an investment of \$100,000 in the Nasdaq on October 1, 2003 was worth \$321,800 on December 31, 2015 – an annualized gain of 10.0%. The Nasdaq gains include reinvested dividends. In the graph above, the start date for PIF4 is shown as Dec 31, 2003 for readability. The correct start date is Oct. 1, 2003.

General Comments

All three funds were down 15-19% for the year, while the bench mark indices were in positive territory. Most of our underperformance came from a significant unrealized drop in one relatively large holding - Horsehead Holdings Corp. While I try to avoid discussing specific stocks until we have exited the position, at least a brief discussion on Horsehead is warranted here. I would ideally want to discuss this in our annual report, and I will do it there as well in a few months.

Horsehead Holdings (ZINC)

Between the three funds, we own over 6.3 million shares of Horsehead. Horsehead was originally bought in November and December 2008 as a classic Ben Graham net net investment. It was trading well below just the value of its net current assets minus all liabilities. I first learnt of Horsehead in this Forbes article:

<http://www.forbes.com/forbes/2008/1110/056.html>

After studying all nine businesses listed as net nets in that article, I decided to only invest in Horsehead as part of the commodities basket I was building at the time. We bought about 1.3 million shares of Horsehead for about \$4 million - a 2% bet as part of our 10% commodities basket. Every single bet in that basket worked out very well. Teck Cominco eventually went up 10x. We captured a 7x return on Teck. In less than 13 months, Horsehead had appreciated by over 400% from the price we paid. A nice home run!

In the last six weeks of December 2008 and the first ten weeks of 2009, I was inundated with great investment ideas. It was like drinking from a fire hydrant. I did not get a chance to study these businesses in as much depth as I would have liked. The pricing was such a no-brainer and our position sizes were so small that I acted as fast as I could.

Later I studied businesses like Teck and Horsehead far more closely and discovered that Horsehead was run by an outstanding CEO, a Princeton trained chemical engineer who had a strong appreciation for making very prudent capital allocation bets.

As I exited our commodities basket, I decided to hang on to Horsehead. In December 2009, Horsehead bought INMETCO from Vale for \$38 million. They bought INMETCO for 2 times cash flow. It is a very nice business that generates some \$18 million a year in operating earnings. When a business is changing hands for \$100 million and is valued at over \$400 million a year later and then they buy another \$18 million in earnings for \$38 million, it gets my attention. I liked what the CEO, Jim Hensler, was doing and decided to keep our shares.

In 2011, Jim did another winner deal. He bought Zochem for \$30 million – and it generates \$15 million in operating earnings. Any additional capex that has gone into both these businesses has generated super high ROI. Now we owned a fraction of a business that had invested \$68 million in two businesses and increased operating earnings by \$33 million.

In fact, I carefully studied all of Jim's major capex decisions and execution skills. They were flawless. These new businesses were nicely integrated. In addition, a Greenfield EAF dust recycling plant in South Carolina was built in 2009-10, when construction labor was cheaply available. That plant was commissioned on time at a cost that is at least 30% lower than the same would cost today.

Between 2011 and 2013, I increased our stake in Horsehead significantly. We bought another 5 million shares at prices ranging from \$7-14 a share. In 2011, Horsehead decided to transition zinc production from its 80-year old smelter to using a different chemical process to produce zinc. This new plant was expected to cost about \$350 million and increase EBITDA by \$90-110 million and make them one of the lowest cost zinc producers on the planet. The new plant, coupled with a captive low cost "EAF Dust Mine" that basically never depletes made it a long-term winner.

And Jim was able to do a deal with Shell that allowed Shell to take over the old smelter facility along with any legacy environment liability. It was a coup. Horsehead walked away with no future environmental liability from that plant that had produced zinc for 80 years. And Shell intends to build a cracker at the facility to produce a variety of specialty chemicals from the fracking boom. It was a win-win deal for everyone.

As I write this letter to you, Horsehead's stock is at an all-time low of 67 cents. They ran into a number of cost overruns and ramp-up problems at the new plant. The cost rose to \$500 million and, after 18 months, they are at 25% of capacity with a need for at least another \$100 million to cover losses while the plant ramps up.

At the same time, zinc prices have gone down to levels last seen during the financial crisis. At the beginning of 2015, our Horsehead stake was valued at \$100 million. And even six months ago, it was valued at \$72 million (versus a cost of \$62 million). Today it is worth less than \$5 million. The company has run into severe liquidity issues with no easy prospects of raising capital.

Our entire 2015 loss of 15-19% is because of the decline in Horsehead. If Horsehead's stock price had stayed flat, we would have ended the year flat.

Was the Horsehead investment a mistake? Well, the original bet was not a mistake. The mistake was buying over 4.9% of the shares outstanding. In the last 16+ years at Pabrai Funds, we have bought over 5% or even over 10% of a few public companies. In no cases have we ever ended up with a winner. It is a small data set, but there are obvious reasons why going over 4.9% is dumb. Buying over 10% makes us subject to a variety of insider disclosure rules. Going over 5% requires us to make a 13G filing. All these Form 4 and 13G filings not only add cost and administrative time, but they also make it hard to increase or decrease position size.

If we owned less than 4.9% of Horsehead, it is almost certain we would have done tax loss selling in 2015 at significantly higher prices – and decided not to buy it back based on all the updated current facts. We are going to endeavor to never ever go over 4.9% anymore on any stock in the US. Been there. Done that. Got the T-shirt.

One can make mistakes in investing and end up with a profit (e.g. Chesapeake). Or you can lose money and the bet would still have been the right one to make. If the odds of tails in a coin toss is 75% and pays 1:1, it is a very worthwhile bet to make, even though there is a 25% chance you lose the bet. We are going to lose some, even when we are ultra-vigilant and prudent. It is the nature of the game. With Horsehead, just 6 months ago, things looked benign. zinc prices were decent and the best information management had was that they had sufficient runway to get the new plant to 100% capacity and be generating nearly \$200 million a year or more in EBITDA.

But we ended up with a trifecta of low probability events in unison. They ran into very significant ramp-up difficulties on a proven process, at the same time zinc prices collapsed to levels not seen since the financial crisis. Nickel prices have collapsed to a multi-decade low. All of these decreased profitability and increased the need for cash at the very same time that their liquidity was becoming quite stressed. Looking back at all the available information, I would still have made the investment (though we'd have maxed out at \$35 million invested).

It is hard to predict where we end up with Horsehead, but the prospects are not good. They do have a wide range of assets whose value exceeds the company's liabilities, but if there is a restructuring, assets like INMETCO and Zochem may be sold at fire-sale prices and restructuring costs themselves may be significant. In addition, it is unknown when the new plant will be profitable or when zinc prices may recover. The good news is that we have taken nearly all of the pain. There are no plans to add to our position. Even with a 100% loss on Horsehead, Pabrai Funds has plenty of other great irons in the fire and we expect to do quite well in the years ahead.

Pabrai Funds – A Longer-term Snapshot

Since late 2008, I started discussing potential portfolio additions with Guy Spier. And by Q2 2009, the pre-investment checklist was in place. The combination of these two changes has led to meaningful positive changes in investing outcomes. From the six year period of 2010 to 2015, our realized gains across the entire portfolio have been over \$350 million. Realized losses are under \$65 million. And that \$65 million realized loss includes nearly \$18 million of tax loss selling we did in late 2015 that we will endeavor to buy back after 31 days. Further, we have unrealized gains of \$161 million in our portfolio and unrealized losses of \$71 million (the bulk of which is Horsehead).

Sir John Templeton often remarked that his investment analysis was proved wrong about 1/3 of the time. Mistakes and losses are part of the investment landscape. If we just used dollars to measure right and wrong decisions (a somewhat flawed approach), since 2010, Pabrai Funds has a right to wrong ratio of 511:136 or about 3.76:1. So far we are doing far better than 2:1 – closer to 4:1 actually. The goal is to always try to get realized losses to be as close to zero as possible.

*Rule No.1: Do not lose money.
Rule No. 2: Do not forget Rule No. 1*

- Warren Buffett

Wiser words were never said ☺.

Fiat Chrysler (FCAU) Position Size

We ended 2015 with about \$490 million in assets across all three funds (after redemptions). Our Fiat Chrysler position was valued at \$192.5 million at year end – about 39% of total assets. We have never invested over 10% of assets in any single position. The cost basis of our Fiat position is under \$70 million. On January 4, Ferrari was spun out from Fiat and we received 1.38 million Ferrari shares valued at \$45.58 each or about \$63 million. Fiat was valued at \$8.98 right after the spinoff, valuing it at about \$124 million. Without us lifting a finger, our Fiat stake went from 39% to about 25% of assets. I like that.

Ferrari makes 7000 cars a year and Fiat Chrysler make about 5 million cars. The Ferrari stake alone is worth nearly 90% of what we paid for the combined business in 2012. Fiat Chrysler remains seriously undervalued and I have no intention of selling any shares at present prices.

Ferrari and Fiat Chrysler are very different businesses. They do share common leadership. Ferrari is also undervalued based on what this leadership team is capable of doing. We are also not intending to sell any Ferrari shares at this time. Without ever having spent even \$1 on advertising, it is one of the most recognized and valuable ultra-luxury brands on the planet.

I am just providing this color so investors understand that our concentrated bet on Fiat has declined significantly as a percentage of assets.

Alignment of Interests

My immediate family has a stake of 230,592 units of PIF2, 8,417 units of PIF3, 980,833 units of PIF4; and about 33,000 units of PIF4 in a retirement account. In addition, the administrative team at Pabrai Funds owns about 1,300 units of PIF4 and about 5,900 units of PIF3 in various retirement accounts. The aggregate stake in Pabrai Funds of the Pabrai family and staff at Pabrai Funds is worth over \$39 million.

Pabrai Funds charges no management fee, just performance fees – which are ¼ of the returns over 6% annualized (subject to high-water marks). I only get paid when you make money. When you win, I win. I am very bullish on the long-term future of Pabrai Funds – as demonstrated by my being the second largest investor in the funds. No performance fees were earned by the funds in Q4 2015.

Besides a \$9 million investment in Dhandho Holdings, my family and I have no other meaningful interests in any other mutual funds, hedge funds or private equity funds. Our interests are completely aligned.

2015 Annual Meeting Transcript

The Annual Meeting transcript is posted on our website. Here is the link to the transcript:

http://www.pabraifunds.com/website/2015_PIF_AM_Transcript.pdf

The transcript is best read in conjunction with the presentation slides (the password to the video is “Warren”):

<https://vimeo.com/139966800>

Presentations and Interviews

I lectured via Blue Jeans videoconferencing system to students at **Carroll School of Management (Boston College)** on December 3, 2015. You can watch the session on Youtube:

<https://youtu.be/7F2IGzES7Uc>

Annual Report – Will be out in May 2016

Our modus operandi is now to provide expansive commentary in the annual reports and the annual meetings. The quarterly letter will continue to provide updated performance numbers and announcements, but minimal commentary. The annual report is slated to be published in May, 2016.

Final K-1's (for US Investors)

For PIF2 and PIF4 investors, we expect your final K-1s to be emailed to you (password protected) in March 2016.

2016 Annual Meetings – Save the Date

There will be our two annual meetings sequentially at Orange County, California & Chicago, Illinois. We are also adding a 3rd annual meeting at our Dhandho Holdings Corporation headquarters in Puerto Rico! The Puerto Rico meeting will be on September 24, 2016.

Prior to the California meeting on September 10, 2016 we will have the 3rd Annual Gran Fondo Dhandho Bike Ride which will start at 8:15am. It's a scenic ride around the Newport Estuary with views of the Pacific Ocean in Newport Beach, California. Biking can be a dangerous activity; we only want folks who are decent bikers on the ride. The ride begins at Starbucks in Newport Beach, and ends there around 10:30am. For folks that just wanna chill, you can come to the Starbucks at 10:30am and hang out with the bikers. Here is a link to the Starbucks location:

<http://www.starbucks.com/store/18175/us/jamboree-bristol/3601-jamboree-road-newport-beach-ca-926602961>

The **California** meeting is scheduled to be on **Saturday, September 10th, 2016** at 4:00 PM at:

[Soka University](#)

Performing Arts Center

1 University Drive, Aliso Viejo, California 92656

Tel. +1949.480.4000

Soka University has a spectacular campus nestled in the scenic hills of Aliso Viejo. It is a 20 minute drive from Orange County Airport (SNA), and about an hour drive from LAX.

There is a fantastic Marriott Club Sport hotel about 3 miles from Soka University:

[Marriott Renaissance ClubSport](#)

50 Enterprise

Aliso Viejo, CA 92656

Reservations: 800-468-3571

Phone: 949-643-6700

There are many hotels in the area. Here is a link to other hotels near Soka University:

<http://tinyurl.com/8dmevvu>

The **Chicago** meeting is thus scheduled to be on **Saturday, Sept. 17th, 2016** at 4:00 PM at:

[Carlucci's Restaurant](#)

(The Auditorium)

6111 North River Road, Rosemont, Illinois 60018

Tel. +1847.518.0990

Carlucci's is a five minute taxi ride away from O'Hare airport. [The Marriott Suites O'Hare](#) and [The Westin O'Hare](#) are both next to the restaurant. In addition, there are a plethora of hotels in the vicinity. Good deals on O'Hare hotels are usually available on the major travel-related websites.

The **Puerto Rico** meeting is scheduled to be on **Saturday, Sept. 24th, 2016** at 4:00PM at:

The Bankers' Club

Banco Popular Building

206 Tetuan Street, San Juan, PR 00902

The Bankers' Club is on the top floor of the historic Banco Popular building in Old San Juan. This is the same building where our Dhandho Holdings offices are located.

There is a fantastic hotel where we have secured a special rate of \$185/night. This rate comes with a complimentary continental breakfast and a 15% discount on meals in the main restaurant, *Patio Negro*. The hotel is a 5 minute walk from the Banco Popular Building. Please mention "Dhandho Holdings" to get this rate.

[Hotel El Convento:](#)

100 Cristo Street

Old San Juan, PR 00901

Reservations: +1787.723.9020

Agenda:

4:00 – 4:30 PM: Meet and Greet

4:30 – 6:30 PM: Presentation and Q&A

6:30 – 7:15 PM: Cocktail Hour

7:15 PM: Dinner

The invites will go out in July, 2016. Your significant other and kids of all ages are welcome to attend. I look forward to seeing you in September.

Assets Under Management

There is \$491 million in assets under management between all the funds as of January 1, 2016.

Thanks for your continued interest, referrals and support. Feel free to call me at +1949.453.0609 or email me at mp@pabraifunds.com with any queries or comments.

Warm regards,
