Positioning of Each Initiative in the "Medium-Term Management Plan 2027"

Basic Policy for Medium-Term Management Plan 2027

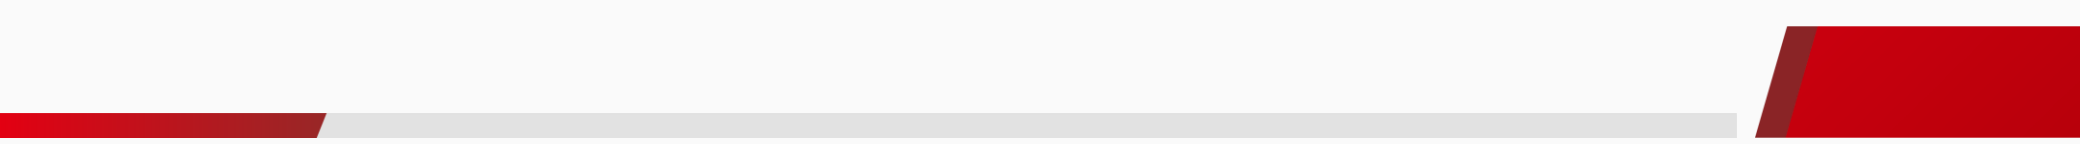

Exchange & beyond

- We will strictly maintain our customer-oriented, "market-in" approach based around societal issues and user needs, and will continue to actively venture into new fields while developing the foundations we have built in the first stage.
- As a core infrastructure of Japan's financial and capital markets, while enhancing trust in the market and JPX Group, we will aim to increase the value we provide to society through, for example, providing strong support for the promotion of Japan as a leading asset management center.

1. Index Business Initiatives

2. Data Business Initiatives

1. Index Business Initiatives

2. Data Business Initiatives

TOPIX Revisions (Next-Generation TOPIX)

- TOPIX is widely used as a market average benchmark that comprehensively covers the Japanese stock market and has high functionality as an investable index.
- The second stage of revisions will aim to further enhance functionality by implementing periodic reviews of issues in all market segments (Prime, Standard, Growth) with a greater emphasis on liquidity. (See “Results of Estimations” below for effects)
- We expect this to lead to benefits for investors in general, such as lower management costs for passive management and index investing.

Second Stage of Revisions

1 Expand the eligible markets to Standard and Growth.

2 Conduct periodic reviews based on liquidity.

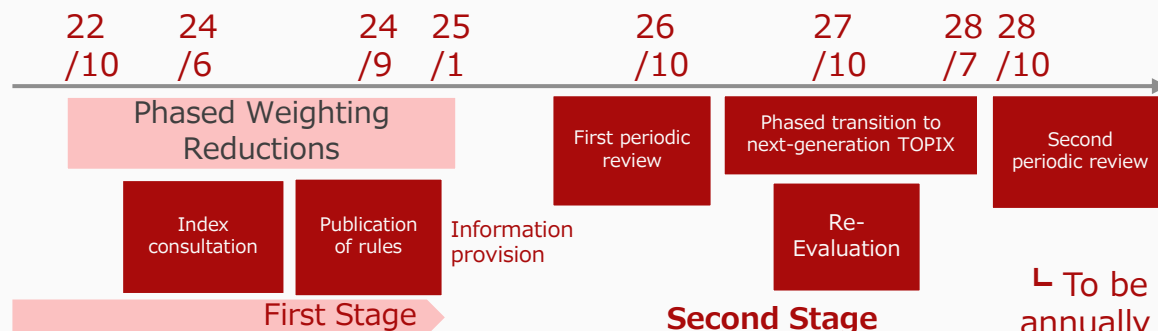

Indicator	Inclusion Criteria	Continuation Criteria
Annual Traded Value Ratio	0.2 or more	0.14 or more
Percentage of Cumulative Free-Float Adjusted Market Capitalization	In the top 96%	In the top 97%

3 The first periodic review will take place in Oct. 2026, followed by a re-evaluation in Oct. 2027, and a second periodic review in Oct. 2028.

Results of Estimations

	Current TOPIX	Next-Gen TOPIX	Comparison with Current TOPIX
Total Free-Float Adjusted Market Capitalization	JPY 490 tril.	JPY 485 tril.	Approx. 1% difference (same for market coverage ratio)
Free-Float Adjusted Market Capitalization (Median)	Approx. JPY 39.2 bil.	Approx. JPY 82 bil.	Around double
Daily Trading Value (Median)	Approx. 310 mil.	Approx. JPY 750 mil.	
Number of Constituents	Approx. 1,700	Approx. 1,200	Approx. 50 constituents from the Standard and Growth Markets

Revision Schedule

*Calculated based on the results as of the last business day of August 2024

↳ To be conducted annually from this point.

Recent Initiatives

- As of June 2025, JPX offers over 250 indices. Recent initiatives in index development (including joint development) are described below.
- We will continue to promote the development of indices that meet the needs of investors, while also focusing on promoting existing indices.

Index		Details	Calculation Start Date /Linkage Implementation Date
New Index Development	S&P/JPX Prime Market 250 Index	• An index that tracks and measures the performance of 250 of the largest and most liquid stocks traded on the Prime Market of TSE. • Designed to help facilitate transparent access to the ever-evolving Japanese equity market for offshore investors in response to growing interest in Japanese stocks overseas.	2024/12/9
	TOPIX Banks High Dividend Index	• An index consisting of 15 constituents with high actual dividend performance from the constituents of TOPIX Banks. • In addition to expectations for improved bank earnings amid rising interest rates, this product was developed in response to demand for investment in high-dividend stocks.	2024/12/16
	JPX-Nikkei Index Human Capital 100	• An index composed of 100 constituents that practice human capital-conscious management. • Developed as an indicator of the performance of companies that practice human-capital conscious management, amidst growing recognition of the importance of investing in human capital and government policies.	2025/7/22 (Planned)
Linkage of FTSE Blossom Japan Index Series with TOPIX		• Enhanced widely used sustainable indices by applying TOPIX constituent stock information to the FTSE Blossom Japan Index series. Renamed to "FTSE JPX Blossom Japan Index series." • We expect index investing focused on the sustainability of companies listed on the Japanese stock market to become more widespread.	2025/12 (Planned)

1. Index Business Initiatives

2. Data Business Initiatives

- 1** Expand data content by leveraging new technologies and partnerships
- 2** Embrace data sharing business models in addition to conventional data distribution
- 3** Leverage technologies such as generative AI to improve the discoverability of information

Data Service Initiatives (1)

■ Main Initiatives (Expand Data Content)

Data Content Expansion Method

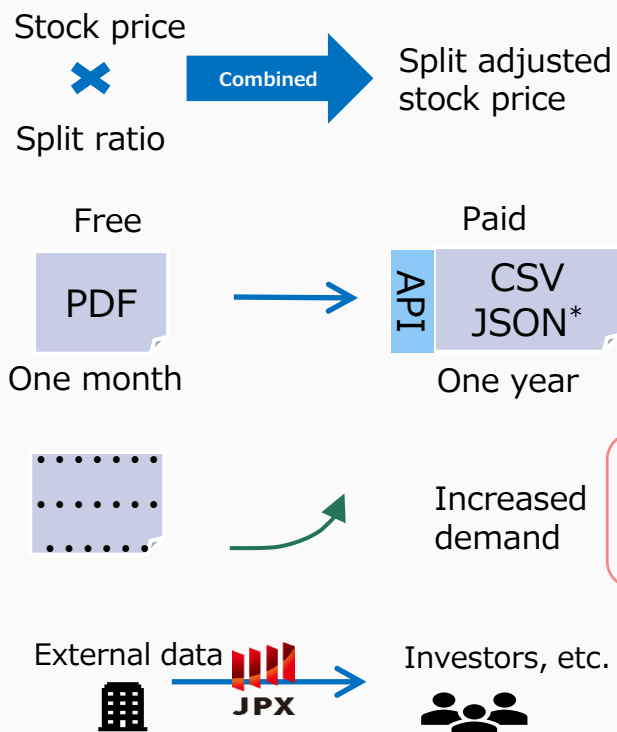

Revise existing numerical data

Respond to demand for automated processing

Text data

Partner data

Specific Examples

Service Examples

J-Quants (individual/corporate)

Snowflake support

A service that delivers financial data in a user-friendly format.

Data provision via cloud data platform

Partner Collaboration, SCRIPTS Asia, Etc.

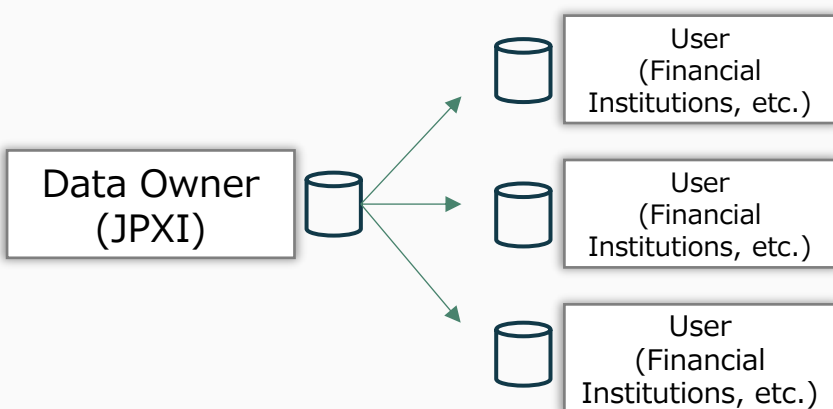

*Format that is easy to process automatically by the program

Data Service Initiatives (2)

■ Main Initiatives (Embrace Data Sharing Business Models)

- With the increase in data volume and the development of AI technology, attention is turning to data sharing.
- Demand in Japan has been growing rapidly since last year, and JPX announced a partnership with Snowflake in early 2025.
- Domestic asset management and securities companies have a high demand for automated processing using generative AI, and J-Quants data is already available. Order execution and quote information, corporate action information, disclosure documents, index base information, etc. are scheduled to be supported this fiscal year.
- In the future, there is potential to expand our data business support to include tools and apps.

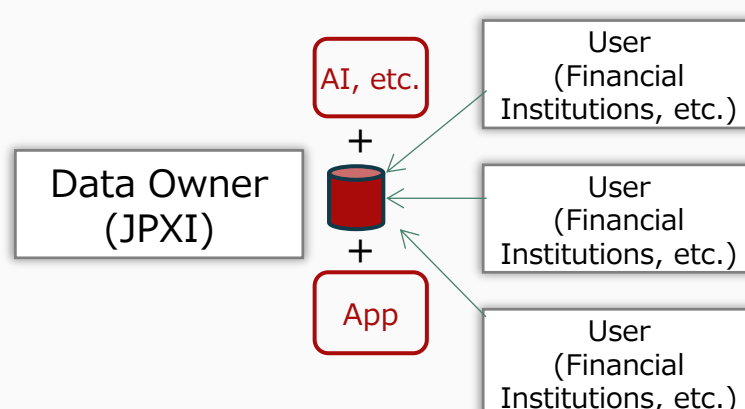

Conventional Data Delivery

(Challenges)

- Requires the user to store data
- Large amounts of data must be exchanged, placing a burden on both sides

Data Sharing

- Users don't have to store large amounts of data
- Significantly reduces the amount of data exchanged
- **Extensive analysis tools such as AI, etc.**

(Future Potential)

- **Expansion of data/app services**

Data Service Initiatives (3)

■ Main Initiatives (Improve the Discoverability of Information)

- More and more data and information is becoming available to gain a deeper understanding of investment targets and products.
- However, the difficulty of finding that information is increasing, and we aim to use digital technology to contribute to solving that issue.

Challenges

- Too much information for users to process.
- The amount of data available is expected to increase.

Listed Companies

Approx. 4k

Stock Prices/Trading Volume, etc.

Approx. 270m/day

Disclosure Materials

150k/year
Over 1m pages

Amount of Data Content

Free: 123 types
Paid: 117 types

Service Examples

1

JPX Market Explorer

2

JPxData Portal

1

Information service for the Japanese market using gen. AI.

2

Comprehensive cataloging and introduction of data from JPX Group, etc.

Gen. AI

Company information
(charts, financial data,
analysis) that can be
read in 5 mins

Screening features

Support in
multilingual languages

Gen. AI

Search by common
name, brand name,
or product name

Gen. AI

Gen. AI search tags
(Japanese-English)

240 types from JPX
+ 40 types from
partner companies

Future Initiatives Introduction of AI Search

Users want to search in plain language, find similar disclosures, and narrow searches down to relevant items.

Future Initiatives Expansion of Self-Service

Streamline the process from search to contract

J-Quants (Already achieved with approx. 30 types of data).
