

QuidelOrthoTM

William Blair 42nd Annual Growth Stock Conference

June 08, 2022

Forward-Looking Statements and Non-GAAP Financial Measures

Forward-Looking Statements: This presentation of QuidelOrtho Corporation (“QuidelOrtho” or the “Company”) contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. You can identify these statements and other forward-looking statements in this presentation by words such as “may,” “will,” “would,” “expect,” “anticipate,” “believe,” “estimate,” “plan,” “intend,” “continue,” or similar words, expressions or the negative of such terms or other comparable terminology. These statements include, but are not limited to, the benefits and results of the business combination transaction and integration of the businesses of Quidel and Ortho, including QuidelOrtho’s execution of cost and revenue synergies, commercial and other strategic goals, future financial and operating results, future plans, objectives, strategies, expectations and intentions and other statements that are not historical facts. Such statements are based upon the current beliefs and expectations of QuidelOrtho’s management and are subject to significant risks and uncertainties. Actual results may differ from those set forth in the forward-looking statements. The following factors, among others, could cause actual results to differ from those set forth in the forward-looking statements: the challenges and costs of integrating, restructuring and achieving anticipated synergies as a result of the business combination; the ability to retain key employees; and other economic, business, competitive, and/or regulatory factors affecting the business of QuidelOrtho generally. Additional risks and factors are identified under “Risk Factors” in QuidelOrtho’s joint proxy statement/prospectus filed with the Securities and Exchange Commission (the “Commission”) on April 11, 2022 and subsequent reports filed with the Commission. You should not rely upon forward-looking statements as predictions of future events because these statements are based on assumptions that may not come true and are speculative by their nature. QuidelOrtho has no obligation to update any of the forward-looking information included in this presentation, whether as a result of new information, future events, changed expectations or otherwise, except as required by law.

Non-GAAP Financial Measures: This presentation contains financial measures, such as constant currency growth rate, Adjusted EBITDA, Adjusted EBITDA margin, and adjusted EPS, which are considered non-GAAP financial measures under applicable rules and regulations of the Commission. These non-GAAP financial measures should be considered supplemental to, and not a substitute for, financial information prepared in accordance with generally accepted accounting principles in the U.S. (“GAAP”). QuidelOrtho’s definitions of these non-GAAP measures may differ from similarly titled measures used by others. QuidelOrtho generally uses these non-GAAP financial measures to facilitate management’s financial and operational decision-making, including evaluation of the Company’s historical operating results, and comparison to competitors’ operating results. These non-GAAP financial measures reflect an additional way of viewing aspects of QuidelOrtho’s operations that, when viewed with GAAP results and the reconciliations to corresponding GAAP financial measures, may provide a more complete understanding of factors and trends affecting the Company’s business. Because non-GAAP financial measures exclude the effect of items that will increase or decrease the Company’s reported results of operations, management strongly encourages investors to review the Company’s consolidated financial statements and publicly filed reports in their entirety. Reconciliations of the non-GAAP financial measures to the most directly comparable GAAP financial measures are included in the Appendix to this presentation.

Our History and Future Focus

Key Messages

The combination creates an in vitro diagnostics leader, bringing together innovative, complementary products, solutions, and services that enhance the health and well-being of patients across the globe

Integration of the organizations is our top priority, while maintaining the culture that defines us and our unrelenting focus on commercial excellence

Focus on base business execution, while accelerating and exceeding cost and revenue synergy targets

Highly experienced management with proven track record

Doug Bryant
Chairman and
Chief Executive Officer

- President and CEO of Quidel from 2009 - 2022
- 30+ years of industry experience in both the diagnostics and life sciences markets
- Formerly EVP and COO at Luminex Corporation
- Previous senior leadership roles at Abbott laboratories

Robert Bujarski
President and
Chief Operating Officer

- Chief Operating Officer of Quidel 2020 – 2022
- 30+ years of enterprise experience spanning operational, commercial, and legal functions within the diagnostics sector
- Served in various senior leadership roles at Quidel since 2005

Joe Busky
Chief Financial Officer

- Chief Financial Officer of Ortho 2020 – 2022
- 30+ years public and private-equity company experience
- Formerly CFO of Vyair Medical
- Finance leadership across global diagnostics – Dade Behring, Siemens – as well as medtech, telecom and marketing services

Michael Iskra
Chief Commercial Officer

- EVP of Commercial Excellence and Strategy of Ortho 2020 – 2022
- 25+ years commercial and operations - diagnostics and healthcare experience
- Served as President of Ortho North America 2015 – 2020
- Previous senior leadership roles at Healthways and Bayer, Siemens Diagnostics

QuidelOrtho: A Global In Vitro Diagnostics Leader

1. Based on management's estimates for 2023 Pro forma Adjusted EBITDA per the joint proxy statement

2. Based on management's long-term estimate beginning in 2023

Combination creates a global IVD leader

Large and growing markets

	Point-of-Care	Clinical Chemistry	Immunoassay (Central Lab)	Molecular Diagnostics	Transfusion Medicine
Total Addressable Market ¹	\$15.2B	\$7.5B	\$17.0B	\$20.6B	\$2.1B
Steady State Growth ²	7-9%	3-5%	6-8%	8-10%	2-4%
Expected Drivers	- Expanded access - Decentralization & Consumerization - Innovations in performance and menu	- Growing appreciation for value of routine Dx - Rise of preventative care, wellness screening - Aging population	- Menu expansion - Adoption of high-value tests (e.g., PCT, AMH) - Installed base upgrades	- Demand for gold-standard sensitivity - Ubiquitous COVID adoption - Rise of syndromic testing	- Expanded access - Proliferation of advanced surgeries requiring T&S - Accelerated plasma donations and novel applications
Mix of Business ³	25-30%	20-25%	20-25%	5-10%	20-25%

~\$50B Total Market Served⁴ with High-Single-Digit Growth

1. Sourced from IQVIA; 2. Steady State Growth based on management's estimates and exclude spike of COVID-19 revenues; 3. Estimated mix of 2023 business; 4. Estimated \$50B Servable by QuidelOrtho -- \$20.6B MDx market 40% servable, reducing segment to ~\$8B (non-servable segments: HT MDx and Large Panel Syndromic MDx)

Positioned to take advantage of market trends

	 QUIDEL	Ortho Clinical Diagnostics
Rising demand for diagnostic testing	<i>Manage chronic conditions</i>	✓
	<i>Surgical intervention</i>	✓
	<i>Emerging infectious diseases</i>	✓
	<i>Diagnostic tests to support newly invented markers</i>	✓
	<i>Repeated therapy monitoring</i>	✓
	<i>Increased demand for testing at home and at the patient's bedside</i>	—
Limited skilled resources to manage growing demand	<i>Greater reliance on automated / simple testing</i>	✓
	<i>Systems that generalists can run</i>	✓
	<i>Automation of rule-based testing</i>	✓
Additional macro industry trends	<i>Industry consolidation</i>	✓
	<i>Decentralization of the care setting</i>	—
	<i>Commoditization of diagnostic testing</i>	✓
	<i>Demand for value beyond test results</i>	✓

Market trends – proliferation of testing sites

Menu of offerings covers the entire diagnostics spectrum

Complementary portfolios expected to drive increased pull-through and deeper customer relationships

Expected growth drivers

- 

Integration of the organizations and execution on both cost (\$90M) and revenue (\$100M) synergies, while maintaining the culture that defines us
- 

Cross-selling of our combined product portfolio through our global commercial teams with a key focus on OUS opportunities
- 

Continued implementation of Ortho's Commercial Excellence program that is driving the penetration of the market by our integrated clinical lab instruments and the pulled-through of recurring revenues
- 

Menu pull-through on the large 79K installed base of Sofia instruments
- 

Securing global regulatory clearances for Savanna and penetrating the high-growth molecular diagnostic market
- 

Investment of our strong balance sheet and cash flows into R&D to support menu expansion across our platforms, as well as innovative new instruments

Multiple product-based growth drivers

Savanna

Fully-integrated rapid multiplex Molecular system

- Easy-to-use, with one of the fastest turnaround times and a small footprint utilizing a cost-effective mini-panel concept
- Securing global regulatory clearances for Savanna and penetrating the high-growth molecular diagnostic market
- System has strong appeal in Ortho's small-to-medium sized hospital customers

Savanna®

Sofia

Point-of-Care system that is uniquely positioned for the decentralization of testing

- Revenue pull-through opportunity created by the expanded 79K installed base (up 37K or 90% since 4Q19)
- Menu expansion to include Respiratory virus panel, c. difficile, and other gastrointestinal assays
- Opportunity for expansion into retail and at-home markets

Sofia®

Triage

Cost effective, easy to use instrument for cardiovascular and toxicology diagnostic assays that is used in hospital POC settings

- Significant OUS opportunities that are expected to be much of the near-term cross-selling revenue synergies
- New assays (TriageTrue hsTroponin; Triage PLGF) are expected to accelerate growth

Triage®

Integrated Clinical Lab Analyzer Systems

Higher throughput analyzers that have been driving Ortho's improved growth profile

- Installed base has been growing at double-digits with a long runway to go
- Pulls through both clinical chemistry and higher margin immunoassay consumable revenue
- Refreshed VITROS 5600 Analyzer is expected later this year

VITROS® 5600

VITROS® XT 7600

Savanna's differentiators include cost advantage, panel size and TAT

System has strong appeal in Ortho's small-to-medium sized hospital customers

- 1 Multiplexing technology provides quick diagnosis in one sample**
 - Magnetic bead based nucleic acid isolation
 - 4 color PCR multiplexing for up to 12 analytes/run
- 2 Fast turnaround time**
 - Sample-to-answer in under 25 minutes
 - qPCR with 45 cycles in < 12 minutes
- 3 Fully integrated, easy-to-use system**
 - Direct swab and liquid sample compatibility
 - Reagents stable at room temperature
- 4 Scalable: modularity allows use in low / mid volume settings**
 - Auxiliary bays added vertically or horizontally
- 5 Assay versatility**
 - Qualitative/quantitative assays compatible
 - Combined pathogen/AST testing in one assay run
- 6 Assay development strategy**
 - Develop critical mass of assays near launch time
 - Scalable assay manufacturing concept

Mini-panel assay cartridges for: RVP4, RVP11, HSV-VZV-TP*, GI Panel* (B/V), STI Panel*, Pharyngitis**

*assays under development.

Global commercial footprint provides channel to accelerate compelling product portfolio

- ✓ Global infrastructure across 130 countries
- ✓ Strong presence in mid- and high-volume hospitals
- ✓ 2,300 global commercial teammates
- ✓ Proven track record of worldwide commercial excellence

Current Quidel commercial presence

Additional geographies accessed via existing Ortho commercial infrastructure

Significant opportunity for global cross-selling and channel pull-through with combined infrastructure

Integration & Financials

Strong execution on integration with clear milestones ahead

Process allows the rest of the organization to continue running and growing the businesses

Strong financial profile w/ significant synergy opportunities¹

	 QUIDEL  Ortho Clinical Diagnostics	Synergy opportunity
Addressable market opportunity	~\$50B	Cost  • ~\$90 million of achievable annual cost synergies identified from optimizing combined company infrastructure, representing ~5% of estimated total operating costs
Long-term revenue growth outlook	HSD-DD CAGR ²	Revenue  • ~\$100 million of expected annual revenue synergies from transaction • ~70% of revenue synergies expected from Molecular products – cross-selling into same call-points and using geographical footprint and expertise outside U.S. to launch new products like Savanna • Long-term R&D synergies as we leverage cross-portfolio opportunities, like POC chemistry or high throughput molecular capabilities in the hospitals
EBITDA margin ³	>30%	Tax  • Prior-year NOLs of \$1.2 billion create potential cash tax benefit for combined company
EPS	Accretive to cash EPS within 12 months of close	
Operating cash flow ⁴	>\$700M	
ROIC ⁵	High single digits	
Net debt / Adjusted EBITDA	~2.0x ³	

1. Based on management's estimates
 2. Long-term revenue growth outlook based on management's estimates in the joint proxy statement, including revenue synergies
 3. Based on management's estimates for 2023 Pro forma Adjusted EBITDA per the joint proxy statement
 4. Based on management's long-term estimate beginning in 2023
 5. ROIC adjusted to include realization of cash tax benefits

Very Little Customer Overlap, Even in the United States

Analysis of Top 20% U.S. Customer Accounts, which represent vast majority of revenue

1Q 2022 / FY 2021 Pro Forma Financial Results¹

	1Q22	1Q21	Growth	2021	2020	Growth
Total Revenue	\$1,502	\$882	+72%	\$3,741	\$3,428	+8%
Adjusted EBITDA	\$780	\$390	+100%	\$1,518	\$1,563	(3%)
