Forward-Looking Statements

Forward-Looking Statements: This presentation of QuidelOrtho Corporation (“QuidelOrtho” or the “Company”) contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. You can identify these statements and other forward-looking statements in this presentation by words such as “may,” “will,” “would,” “expect,” “anticipate,” “believe,” “estimate,” “plan,” “intend,” “continue,” or similar words, expressions or the negative of such terms or other comparable terminology. These statements include, but are not limited to, the benefits and results of the business combination by and among QuidelOrtho, Quidel Corporation (“Quidel”), Ortho Clinical Diagnostics Holdings plc (“Ortho”) and certain other entities (the “Combinations”) and integration of the businesses of Quidel and Ortho, including QuidelOrtho’s execution of cost and revenue synergies, commercial, integration and other strategic goals, future financial and operating results, future plans, objectives, strategies, expectations and intentions and other statements that are not historical facts. Such statements are based on the beliefs and expectations of QuidelOrtho’s management as of today and are subject to significant risks and uncertainties. Actual results may differ significantly from those set forth or implied in the forward-looking statements. The following factors, among others, could cause actual results to differ from those set forth or implied in the forward-looking statements: the challenges and costs of integrating, restructuring and achieving anticipated synergies as a result of the Combinations; the ability to retain key employees; and other economic, business, competitive, and/or regulatory factors affecting the business of QuidelOrtho generally. Additional risks and factors are identified under “Risk Factors” in QuidelOrtho’s Quarterly Report on Form 10-Q filed with the Securities and Exchange Commission (the “Commission”) on August 5, 2022 and subsequent reports filed with the Commission.. You should not rely on forward-looking statements as predictions of future events because these statements are based on assumptions that may not come true and are speculative by their nature. QuidelOrtho has no obligation to update any of the forward-looking information or time-sensitive information included in this presentation, whether as a result of new information, future events, changed expectations or otherwise, except as required by law. All forward-looking statements are based on information currently available to QuidelOrtho and speak only as of the date hereof.

Supplemental Combined Financial Measures and Non-GAAP Financial Measures

Supplemental Combined Financial Measures: This presentation contains unaudited supplemental combined financial information (“Supplemental Combined Information”) that gives effect to the Combinations as if Quidel and Ortho had been combined for the applicable periods. The Supplemental Combined Information presented is based on the historical financial statements of Quidel and Ortho with reclassification adjustments only and do not include all of the pro forma adjustments required under Regulation S-X Article 11 or Accounting Standards Codification 805, Business Combinations (“ASC 805”). This Supplemental Combined Information is provided for illustrative purposes only, may be updated in the future, and is not necessarily, and should not be assumed to be, indicative of the Company’s expected results of operations or financial position that would have been achieved had the Combinations been completed as of the dates indicated or that may be achieved in any future period. The Supplemental Combined Information should be considered supplemental to, and not as a substitute for, pro forma financial information prepared in accordance with Regulation S-X Article 11 or ASC 805 and should be read in conjunction with the information contained in the sections entitled “The Combinations,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations of Ortho” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations of Quidel” in QuidelOrtho’s joint proxy statement/prospectus (the “Joint Proxy Statement/Prospectus”) filed with the Commission on April 11, 2022 and the historical consolidated financial statements and related notes appearing elsewhere in, or incorporated into, the Joint Proxy Statement/Prospectus, and the Company’s subsequent reports filed with the Commission. The Company’s actual results of operations and financial position will differ, potentially significantly, from the Supplemental Combined Information reflected in this presentation as a result of the methodology used to prepare the Supplemental Combined Information as well as a variety of factors, including but not limited to the effect of certain expected financial benefits of the Combinations (such as revenue and cost synergies), the anticipated costs to achieve these benefits (including the cost of integration activities), tax impacts, and changes in operating results following the date of this presentation.

Non-GAAP Financial Measures: This presentation contains financial measures, including but not limited to “constant currency revenue growth,” “adjusted diluted EPS,” “adjusted EBITDA,” “adjusted EBITDA margin,” “supplemental combined revenue,” “supplemental combined adjusted diluted EPS,” “supplemental combined adjusted EBITDA” and “supplemental combined adjusted EBITDA margin,” which are considered non-GAAP financial measures under applicable rules and regulations of the Commission. These non-GAAP financial measures should be considered supplemental to, and not a substitute for, financial information prepared in accordance with U.S. generally accepted accounting principles (“GAAP”). “Adjusted EBITDA” and “adjusted diluted EPS” eliminate impacts of certain non-cash, unusual or other items that the Company does not consider indicative of its ongoing operating performance, and the Company generally uses these non-GAAP financial measures to facilitate management’s financial and operational decision-making, including evaluation of the Company’s historical operating results and comparison to competitors’ operating results. The Company believes that “supplemental combined revenue,” “supplemental combined adjusted diluted EPS,” “supplemental combined adjusted EBITDA” and “supplemental combined adjusted EBITDA margin” provide helpful Supplemental Combined Information to assist management and investors in evaluating the Company’s adjusted operating results as if Quidel and Ortho had been combined for the applicable periods. The Company’s definitions of these non-GAAP measures may differ from similarly titled measures used by others. These non-GAAP financial measures reflect an additional way of viewing aspects of the Company’s operations that, when viewed with GAAP results and the reconciliations to corresponding GAAP financial measures, may provide a more complete understanding of factors and trends affecting the Company’s business. Because non-GAAP financial measures exclude the effect of items that will increase or decrease the Company’s reported results of operations, management strongly encourages investors to review the Company’s consolidated financial statements and reports filed with the Commission in their entirety. Reconciliations of the non-GAAP financial measures, including the non-GAAP Supplemental Combined Information, to the most directly comparable GAAP financial measures are included in the Appendix at the end of this presentation.

Supplemental Combined Operating Results Summary¹

Solid Results Demonstrate Resiliency of the Combined Business Model

3Q 2022 Highlights

- Adjusted Gross Profit Margin of 56.9% is down (540bps), largely due to the decline in COVID-related revenue
- Adjusted EBITDA declined approximately (48%) to \$226.8M, representing an Adjusted EBITDA margin of 28.9%, above our expectations due to the strong revenue

Key Assumptions

- We are not including a potential large government order for COVID-19 tests in our guidance
- Our flu-related revenue outlook assumes that surges in COVID-19 do not dramatically reduce flu and RSV prevalence, which could shift revenues to COVID at the expense of flu.

1. ABC Combo includes Flu A/B and COVID-19

Summary

We are achieving critical integration milestones, actively pursuing exciting new cross-selling opportunities, and hitting our synergy targets

FY 2022 revenue growth, ex-COVID-19 revenue guidance is narrowed to the high end of the prior range at 7% - 9%, and we're raising our total constant currency revenue growth guidance to 6% - 8%, from prior 3% - 6%

Confident in our strategic priorities and our ability to continue delivering strong financial results over the long term
